# Journal of Testing and Evaluation
# Author Index to Volume 40
# 2012

| Number | Month of Issue | Pages |
|---|---|---|
| 1 | January | 1–202 |
| 2 | March | 203–341 |
| 3 | May | 343–519 |
| 4 | July | 521–686 |
| 5 | September | 687–865 |
| 6 | November | 867–1064 |

# Journal of Testing and Evaluation
# Subject Index to Volume 40
# 2012

1

**1.4305 Steel**
Responses of Austenitic Stainless Steel American Iron and Steel Institute (AISI) 303 (1.4305) Subjected to Different Environmental Conditions (Josip Brnic, Goran Turkalj, Marko Canadija, Domagoj Lanc, and Sanjin Krscanski), March, 319

3

**3-D deformation**
Development of a Robust Stereo-PIV System for 3-D Soil Deformation Measurement (Bingxiang Yuan, Jinyuan Liu, Wenwu Chen, and Kaiwen Xia), March, 256

A

**Absorption**
Evaluation of Various Test Devices for the Measurements of Aggregates and Asphalt Mixtures Specific Gravity (Abraham Bae, Louay N. Mohammad, Samuel B. Cooper, Jr., and William King, Jr.), Jan., 58

**Accelerated curing**
Comparison of Tensile Properties of Strain Hardening Cementitious Composite Cured in Normal and Accelerated Conditions (Shunzhi Qian and Zhigang Zhang), Sep., 778

**Additive**
Effects of Additives for Warm Mix Asphalt on Performance Grades of Asphalt Binders (Chaofan Wu and Menglan Zeng), March, 265
Comparative Study on Laboratory Performance of Hot- and Warm-mix Asphalt Mixtures (Yiqiu Tan, Meng Guo, Huining Xu, and Rui Zhang), Sep., 715

**AD-here HP Plus**
Effects of an Amine Anti-Stripping Agent on Moisture Susceptibility of Sasobit and Aspha-Min Mixes by Surface Free Energy Analysis (Aravinda Buddhala, Zahid Hossain, Nazimuddin M. Wasiuddin, Musharraf Zaman, and Edgar A. O'Rear), Jan., 91

**Adhesion**
Effects of an Amine Anti-Stripping Agent on Moisture Susceptibility of Sasobit and Aspha-Min Mixes by Surface Free Energy Analysis (Aravinda Buddhala, Zahid Hossain, Nazimuddin M. Wasiuddin, Musharraf Zaman, and Edgar A. O'Rear), Jan., 91

**Adhesion strength**
A Note on Wet Paper Web Adhesion Strength (S. Edvardsson, P. A. Gradin, P. Isaksson, and M. Gulliksson), Jul., 682

**Adhesive bonded blank**
In-Plane Testing Behavior of Adhesive-Bonded Steel Sheets: Influence of Sheet Surface Roughness, Adhesive Thickness, and Bonding Width (Ravi Kant and R. Ganesh Narayanan), March, 292

**Adhesive thickness**
In-Plane Testing Behavior of Adhesive-Bonded Steel Sheets: Influence of Sheet Surface Roughness, Adhesive Thickness, and Bonding Width (Ravi Kant and R. Ganesh Narayanan), March, 292

**Aero-engine**
Experimental Study of Thermal Contact Conductance Based on Heat-Transfer Theory with Variable Thermal Conductivity (Zong Ren Wang, Jun Yang, Mingyuan Yang, and Weifang Zhang), Jul., 677

**Aggregate**
Degradation Behavior and Mechanism of HMA Aggregate (Tao Ma, Xiaoming Huang, Yongli Zhao, Hao Yuan, and Xin Ma), Sep., 697
Application of Sessile Drop Method to Determine Surface Free Energy of Asphalt and Aggregate (Jianming Wei and Yuzhen Zhang), Sep., 807

**Aggregate gradations**
Evaluation of Air Void Distributions of Cement Asphalt Emulsion Mixes Using an X-Ray Computed Tomography Scanner (Zhenjun Wang and Jingjing Xiao), March, 273

**Aggregate image measurement system**
Comparison of Shape Parameters for Selected Coarse Aggregates in Oklahoma (Dharamveer Singh, Musharraf Zaman, and Sesh Commuri), May, 409

**Aging**
Rheological and Rutting Characterization of Asphalt Mixes with Modified Binders (S. Anjan kumar and A. Veeraragavan), Jan., 66
Effect of Silicone Maintenance Materials on Asphalt Binders and Mixtures (Juntao Lin, Meizhu Chen, Lu Wan, and and Shaopeng Wu), Jan., 78
The Creep Testing Apparatus (CRETA): A New Testing Device for Measuring the Viscoelasticity of Joint Sealant (Qiang Li, Raphael W. Crowley, David B. Bloomquist, and Reynaldo Roque), May, 387
Application of the Steam Aging Method to Evaluate the Long-Term Performance of Secondary Materials for Road Construction (S. Akbarnejad, L. J. M. Houben, and A. A. A. Molenaar), Sep., 754

**Aging kinetics**
A Study on Photo-thermal Coupled Aging Kinetics of Bitumen (Hui Wang, Zhengang Feng, Bo Zhou, and Jianying Yu), Sep., 724

**Aging properties**
Effect of Layered Double Hydroxides (LDHs) on Aging Properties of Bitumen (Yongfang Huang, Zhengang Feng, Henglong Zhang, and Jianying Yu), Sep., 734

**Air void distributions**
Evaluation of Air Void Distributions of Cement Asphalt Emulsion Mixes Using an X-Ray Computed Tomography Scanner (Zhenjun Wang and Jingjing Xiao), March, 273

**Aircraft**
Development of a Novel Test Rig for the Evaluation of Aircraft Fuel Tank Sealant (M. N. Hooper, A. R. Hutchinson, J. G. Broughton, and M. A. Taylor), Jan., 177

**Aircraft engine**
In Situ Eddy-Current Testing on Low-Pressure Turbine Blades of Aircraft Engine (Gong-Jin Qi, Hong Lei, Gang-Qiang Fu, Peng Jing, and Jun-Ming Lin), Jul., 553

**Airport pavement**
Correlation Analysis of 2D Tomographic Images for Flaw Detection in Pavements (Kyle Hoegh and Lev Khazanovich), March, 247

**Air-raid target**
A New Method for Threat Assessment and Uncertainty Analysis of Air-Raid-Target-Based on Connection Number (Yong-Guang Chen, Hong-Fa Ke, and Ke He), Nov., 1033

**Alkali hydrogen peroxide**
Dissolving Behavior of Carbohydrate Ingredients During Pre-Extraction Process of Alkaline Hydrogen Peroxide of

Bamboos (Xueping Song, Hui He, Zhi Li, Qing Wang, and Shuangfei Wang), May, 343

**Alkaline copper quaternary**
Moisture Meter Calibrations for Untreated and ACQ-Treated Southern Yellow Pine Lumber and Plywood (C. R. Boardman, Samuel V. Glass, and Charles G. Carll), Jan., 184

**Ambient vibration**
System Identification of a Reinforced Concrete Building Using the Complex Mode Indicator Function and the Hilbert Transform Techniques (Pelin Gundes Bakir, Ender M. Eksioglu, and Serhat Alkan), May, 427

**Analysis of variance (ANOVA)**
Low Cycle Fatigue Experiments on Turbogenerator Steels and a New Method for Defining Confidence Bands (Giorgio Olmi), Jul., 539

**Analytic hierarchy process (AHP)**
Evaluating the Entry Mode for Taiwan Insurance Companies by Using AHP Sensitivity (Elaine Ho and Chun Yueh Lin), May, 476

**Analytical model**
Comparison of Damage Criteria for Structures to Near-Field Blast-Induced Ground Motions (D. Mehmet Özcan, Alemdar Bayraktar, and Ahmet Can Altunişik), Jan., 148

**Angularity**
Comparison of Shape Parameters for Selected Coarse Aggregates in Oklahoma (Dharamveer Singh, Musharraf Zaman, and Sesh Commuri), May, 409

**ANP**
A Green Purchasing Model by Using ANP and LP Methods (Chin-Tsai Lin, Chie-Bein Chen, and Ying-Chan Ting), March, 203

**Anti-aging additive**
Performance Evaluation of SBS Modified Asphalt with Different Anti-aging Additives (Zhengang Feng, Song Xu, Yubin Sun, and Jianying Yu), Sep., 728

**API 5L steel pipe**
Fracture-Toughness Evaluation in Submerged Arc-Welding Seam Welds in Nonstandard Curved SE(B) Specimens in the Short Radial Direction of API 5L Steel Pipe (D. Angeles-Herrera, J. González-Velázquez, and A. J. de Morales-Ramirez), Nov., 886

**APMP**
Characterizations of Bamboo Succus And Alkaline Peroxide Mechanical Pulping (APMP) Brightness of Bambusa Chungii (Xueping Song, Lianxin Luo, Qing Wang, and Shuangfei Wang), May, 349

**Aquasorp®**
Influence of Drying and Wetting Cycles on SWCCs of Fine-Grained Soils (Sneha Jayanth, Kannan Iyer, and D. N. Singh), May, 376

**Aspect ratio**
Study on the Intrinsic Viscosity of Bitumen Containing Organo Montmorillonite Nanoclay (Gang Liu, Martin van de Ven, Shaopeng Wu, and Andre Molenaar), Sep., 833

**Asphalt**
Properties of Asphalt Mixtures Containing Various Fibers (Qunshan Ye and Hongxin Guan), Sep., 708
Application of Sessile Drop Method to Determine Surface Free Energy of Asphalt and Aggregate (Jianming Wei and Yuzhen Zhang), Sep., 807

**Asphalt binder**
Effects of Additives for Warm Mix Asphalt on Performance Grades of Asphalt Binders (Chaofan Wu and Menglan Zeng), March, 265
Correlation of Flow Number with Stiffness Obtained from Dynamic Shear Rheometer Testing of Extracted Binder from Asphalt Concrete Containing Recycled Asphalt Pavement (Alex K. Apeagyei and Stacey D. Diefenderfer), Jul., 612

**Asphalt concrete**
Correlation of Flow Number with Stiffness Obtained from Dynamic Shear Rheometer Testing of Extracted Binder from Asphalt Concrete Containing Recycled Asphalt Pavement (Alex K. Apeagyei and Stacey D. Diefenderfer), Jul., 612
Comprehensive Evaluation of Small Strain Viscoelastic Behavior of Asphalt Concrete (B. Shane Underwood and Y. Richard Kim), Jul., 622
Effectiveness of Solar Heat Reflective Coatings in Reducing Asphalt Concrete Temperature (Zheng Chen and Dengcheng Ma), Sep., 740
Fatigue Crack Assessment of Asphalt Concrete Pavement on a Single Span Highway Bridge Subjected to a Moving Truck (Youngguk Seo, Cheolmin Baek, and Y. Richard Kim), Nov., 983

**Asphalt mixture**
A Practical Dynamic Modulus Testing Protocol (Xinjun Li and R. Christopher Williams), Jan., 100
Evaluating Laboratory Compaction of Asphalt Mixtures Using the Shear Box Compactor (J. Qiu, N. Li, F.P. Pramesti, M.F.C. van de Ven, and A.A.A. Molenaar), Sep., 844
Comparison of Dynamic Moduli for Asphalt Mixtures Determined from Different Geometries and Compactions (Andrew Lacroix, Y. Richard Kim, and Consuelo Arellano), Nov., 1006

**Asphalt mixtures**
Effect of Phase-Change Materials on Thermal and Mechanical Properties of Asphalt Mixtures (Meizhu Chen, Lu Wan, and Juntao Lin), Sep., 746

**Asphalt pavement analyzer**
Correlation of Flow Number with Stiffness Obtained from Dynamic Shear Rheometer Testing of Extracted Binder from Asphalt Concrete Containing Recycled Asphalt Pavement (Alex K. Apeagyei and Stacey D. Diefenderfer), Jul., 612

**Aspha-Min**
Effects of an Amine Anti-Stripping Agent on Moisture Susceptibility of Sasobit and Aspha-Min Mixes by Surface Free Energy Analysis (Aravinda Buddhala, Zahid Hossain, Nazimuddin M. Wasiuddin, Musharraf Zaman, and Edgar A. O'Rear), Jan., 91

**Asphatl**
Effect of Silicone Maintenance Materials on Asphalt Binders and Mixtures (Juntao Lin, Meizhu Chen, Lu Wan, and and Shaopeng Wu), Jan., 78

**ASR**
Correlation Analysis of 2D Tomographic Images for Flaw Detection in Pavements (Kyle Hoegh and Lev Khazanovich), March, 247

**Assessment frameworks**
Middle School Science and Items of High School Entrance Examination: Examining the Gap in Turkey (Salih Cepni, Yilmaz Kara, and Emine Cil), May, 501

**ASTM E 646**
Computation of Tensile Strain-Hardening Exponents through the Power-Law Relationship (Ariel E. Matusevich, Julio C. Massa, and Reinaldo A. Mancini), Jul., 521

**Asynchronous particle swarm optimization**
Solving an Inverse Scattering Problem of an Embedded Perfectly Conducting Cylinder by Asynchronous Particle Swarm Optimization (Chien-Ching Chiu, Jung-Chin Hsu, and Wei-Chun Hsiao), Nov., 896

**Availability**
A Standby System with General Repair and Imperfect Switching (Jau-Chuan Ke, Stéphane M. F. Yen, Tzu-Hsin Liu, and Ying-Lin Hsu), May, 440

**B**

**Balk**
Optimization Analysis of the Machine Repair Problem with Balking and Variable Number of Servers (Kuo-Hsiung Wang, Yuh-Ching Liou, and Dong-Yuh Yang), Nov., 907

**Ballistics**
Evaluation of the Long-Distance Conducted Electrical Weapon XREP® (Sebastian N. Kunz, Matthias Graw, Oliver Peschel, and Nico Grove), March, 281

**Bamboo**
Dissolving Behavior of Carbohydrate Ingredients During Pre-Extraction Process

of Alkaline Hydrogen Peroxide of Bamboos (Xueping Song, Hui He, Zhi Li, Qing Wang, and Shuangfei Wang), May, 343

**Bamboo succus**
Characterizations of Bamboo Succus And Alkaline Peroxide Mechanical Pulping (APMP) Brightness of Bambusa Chungii (Xueping Song, Lianxin Luo, Qing Wang, and Shuangfei Wang), May, 349

**Bank management**
Measurement of Switching Cost on the Customer Retention in the Banking Industry (Yi-Hsien Wang, Kuang-Hsun Shih, and Ya-Chi Huang), Nov., 923

**Bentonite**
Evaluation of Bentonite-Fly Ash Mix for Its Application in Landfill Liners (M. M. Younus and S. Sreedeep), May, 357

**Binders**
Evaluation of Air Void Distributions of Cement Asphalt Emulsion Mixes Using an X-Ray Computed Tomography Scanner (Zhenjun Wang and Jingjing Xiao), March, 273

**Bitumen**
A Study on Photo-thermal Coupled Aging Kinetics of Bitumen (Hui Wang, Zhengang Feng, Bo Zhou, and Jianying Yu), Sep., 724
Effect of Layered Double Hydroxides (LDHs) on Aging Properties of Bitumen (Yongfang Huang, Zhengang Feng, Henglong Zhang, and Jianying Yu), Sep., 734
Study on the Intrinsic Viscosity of Bitumen Containing Organo Montmorillonite Nanoclay (Gang Liu, Martin van de Ven, Shaopeng Wu, and Andre Molenaar), Sep., 833

**Blood culture**
The Development and Evaluation of Blood Volume Measuring System for Blood Culture Quality Improvement (Hun Shim, Kab Seung Kim, Young Uh, Dong Min Seo, Hyo Youl Kim, and Young Ro Yoon), Jul., 655

**Blood volume**
The Development and Evaluation of Blood Volume Measuring System for Blood Culture Quality Improvement (Hun Shim, Kab Seung Kim, Young Uh, Dong Min Seo, Hyo Youl Kim, and Young Ro Yoon), Jul., 655

**Bonding width**
In-Plane Testing Behavior of Adhesive-Bonded Steel Sheets: Influence of Sheet Surface Roughness, Adhesive Thickness, and Bonding Width (Ravi Kant and R. Ganesh Narayanan), March, 292

**Bootstrap method**
Novel Error Prediction Method of Dynamic Measurement Lacking Information (Ge Leyi, Zhao Wei, Huang Songling, and Zhou Jing), Jan., 37

**Boundary element method**
Elliptical Hole-Crack Problems in an Infinite Plate Subjected to Internal Pressure (Xiangqiao Yan and Chengqing Miao), Jul., 531

**Brake roller tester**
Comparative Analysis of Brake Data of Vehicles on Two Different Ministry of Transport Brake Roller Testers (C. Senabre, E. Velasco, and S. Valero), Jul., 597

**Braking**
Comparative Analysis of Brake Data of Vehicles on Two Different Ministry of Transport Brake Roller Testers (C. Senabre, E. Velasco, and S. Valero), Jul., 597

**Bridge**
Fatigue Crack Assessment of Asphalt Concrete Pavement on a Single Span Highway Bridge Subjected to a Moving Truck (Youngguk Seo, Cheolmin Baek, and Y. Richard Kim), Nov., 983

**Bridge experiment**
Testing of a Bridge Weigh-in-Motion Algorithm Utilising Multiple Longitudinal Sensor Locations (Arturo González, Jason Dowling, Eugene J. O'Brien, and Aleš Znidarič), Nov., 961

**Bridge weigh-in-motion**
Testing of a Bridge Weigh-in-Motion Algorithm Utilising Multiple Longitudinal Sensor Locations (Arturo González, Jason Dowling, Eugene J. O'Brien, and Aleš Znidarič), Nov., 961

**Brightness**
Characterizations of Bamboo Succus And Alkaline Peroxide Mechanical Pulping (APMP) Brightness of Bambusa Chungii (Xueping Song, Lianxin Luo, Qing Wang, and Shuangfei Wang), May, 349

**British pendulum test**
A Comparison Study of Friction Measurements for Chip Seal (Jusang Lee, Jaejun Lee, Y. Richard Kim, and Sungho Mun), Jul., 603

**Buildings**
System Identification of a Reinforced Concrete Building Using the Complex Mode Indicator Function and the Hilbert Transform Techniques (Pelin Gundes Bakir, Ender M. Eksioglu, and Serhat Alkan), May, 427

**Burgers' model**
Nonlinear Response Characterization of Bituminous Mortar (M. F. Woldekidan, M. Huurman, and L. T. Mo), Sep., 768

**Burn patterns**
Fire Pattern Repeatability: A Study in Uncertainty (Daniel Madrzykowski and Charles Fleischmann), Jan., 1

## C

**Calibration**
Moisture Meter Calibrations for Untreated and ACQ-Treated Southern Yellow Pine Lumber and Plywood (C. R. Boardman, Samuel V. Glass, and Charles G. Carll), Jan., 184

**Cantilever bend test**
Experimental Bend Tests to Study Mechanical Descaling of Hot-Rolled Steel Rod (Wengai Yang, YaoHou Li, and Christopher Michael Sellars), Jul., 570

**Capability index**
Implementation of Evaluating Process Capability Index $C_{pk}$ for Processes with Multiple Characteristics (W. L. Pearn and C. H. Wu), Jul., 643

**Capillarity**
Influence of Drying and Wetting Cycles on SWCCs of Fine-Grained Soils (Sneha Jayanth, Kannan Iyer, and D. N. Singh), May, 376

**Carbon black**
Characterization of Carbon Black Particles Mixing in Polymeric Matrix by Direct Methods (Zhao-Hui Jiang, Jian Jin, Chang-Fa Xiao, Xin Li, and Ling-Xi Kong), March, 227
Investigation on the Flammability of Diverse Cast PA6 Semi-Finished Products (M. Andó, T. Czigány, and G. Kalácska), Nov., 1027

**Carbon fiber**
Sensing Properties of Carbon Nanotube–Carbon Fiber/Cement Nanocomposites (Junqing Zuo, Wu Yao, Xiaoyan Liu, and Junjie Qin), Sep., 838

**Carbon nanotubes**
Sensing Properties of Carbon Nanotube–Carbon Fiber/Cement Nanocomposites (Junqing Zuo, Wu Yao, Xiaoyan Liu, and Junjie Qin), Sep., 838

**CdS nanowires**
Solvothermal Synthesis of High Yield CdS Nanowires in Ethylenediamine (Zhang Hui, Song Guojun, and Li Jianjiang), May, 491

**Cement asphalt emulsion mixes**
Evaluation of Air Void Distributions of Cement Asphalt Emulsion Mixes Using an X-Ray Computed Tomography Scanner (Zhenjun Wang and Jingjing Xiao), March, 273

**Cement kiln dust**
Evaluation of Durability of Stabilized Clay Specimens Using Different Laboratory Procedures (Roy Khalife, Pranshoo Solanki, and Musharraf M. Zaman), May, 363

**Cement nanocomposites**
Sensing Properties of Carbon Nanotube–Carbon Fiber/Cement Nanocomposites

(Junqing Zuo, Wu Yao, Xiaoyan Liu, and Junjie Qin), Sep., 838

**Cement paste**
Time-Dependent Rheological Changes of Fly Ash Blended Cement Paste (Wei Chen, Zhonghe Shui, and Jianfeng Fan), Sep., 822

**Characterization**
Characterization of Carbon Black Particles Mixing in Polymeric Matrix by Direct Methods (Zhao-Hui Jiang, Jian Jin, Chang-Fa Xiao, Xin Li, and Ling-Xi Kong), March, 227

**Chip seal**
A Comparison Study of Friction Measurements for Chip Seal (Jusang Lee, Jaejun Lee, Y. Richard Kim, and Sungho Mun), Jul., 603

**Chloride binding capacity**
Chloride Binding Capacity of Cement Paste Containing Layered Double Hydroxide (LDH) (Shui Zhonghe, Ma Juntao, Chen Wei, and Chen Xiaoxing), Sep., 796

**Chloride diffusion**
Corrosion of Rebar and Role of Fiber Reinforced Concrete (Manote Sappakittipakorn and Nemkumar Banthia), Jan., 127

**Civil engineering**
System Identification of a Reinforced Concrete Building Using the Complex Mode Indicator Function and the Hilbert Transform Techniques (Pelin Gundes Bakir, Ender M. Eksioglu, and Serhat Alkan), May, 427

**Clay**
Determination of Optimum Fiber Content in a Fiber-Reinforced Clay (Behzad Amir-Faryar and M. Sherif Aggour), March, 334

**Coil retaining ring**
Low Cycle Fatigue Experiments on Turbogenerator Steels and a New Method for Defining Confidence Bands (Giorgio Olmi), Jul., 539

**Common mode subtraction**
A New Method for Strain Measurement in the Tensile Testing of Filamentous Materials (Mengxi Huang, Fuqi Wu, Ziran Li, and Yuanming Xia), Nov., 890

**Compaction**
Comparison of Dynamic Moduli for Asphalt Mixtures Determined from Different Geometries and Compactions (Andrew Lacroix, Y. Richard Kim, and Consuelo Arellano), Nov., 1006

**Concave and convex segment**
Characterizing Profiled Fibers by Multiscale Shape Representations (RongWu Wang, LiPing Tang, PeiFeng Zeng, and BuGao Xu), May, 435

**Concrete**
Using Disturbed State Concept to Predict the Stress–Strain Response of Concrete Attacked by Sulfate (Yanfeng Nie and Chunxiang Qian), Sep., 761

**Concrete pavement**
The Creep Testing Apparatus (CRETA): A New Testing Device for Measuring the Viscoelasticity of Joint Sealant (Qiang Li, Raphael W. Crowley, David B. Bloomquist, and Reynaldo Roque), May, 387

**Confidence bands**
Low Cycle Fatigue Experiments on Turbogenerator Steels and a New Method for Defining Confidence Bands (Giorgio Olmi), Jul., 539

**Confidence interval**
Parameters Estimation Under Step-Stress Life Test Based on Censored Data From Generalized Exponential Model (Ali A. Ismail and S. E. Abu-Youssef), March, 305

**Connection number**
A New Method for Threat Assessment and Uncertainty Analysis of Air-Raid-Target-Based on Connection Number (Yong-Guang Chen, Hong-Fa Ke, and Ke He), Nov., 1033

**Construction sector**
Determining Performance of Marble Finished Products on Their Usage Areas by a New Impact-Resistance Test Method (Gencay Sariisik), Nov., 945

**Consumer's risk**
Designing of Group Sampling Plans Based on Gamma-Poisson Distribution (Muhammad Aslam, Saminathan Balamurali, Chi-Hyuck Jun, Munir Ahmad, and Mujahid Rasool), Nov., 939

**Contact angle**
Application of Sessile Drop Method to Determine Surface Free Energy of Asphalt and Aggregate (Jianming Wei and Yuzhen Zhang), Sep., 807

**Continuum damage**
Fatigue Crack Assessment of Asphalt Concrete Pavement on a Single Span Highway Bridge Subjected to a Moving Truck (Youngguk Seo, Cheolmin Baek, and Y. Richard Kim), Nov., 983

**CoreDry**
Evaluation of Various Test Devices for the Measurements of Aggregates and Asphalt Mixtures Specific Gravity (Abraham Bae, Louay N. Mohammad, Samuel B. Cooper, Jr., and William King, Jr.), Jan., 58

**CoreLok**
Evaluation of Various Test Devices for the Measurements of Aggregates and Asphalt Mixtures Specific Gravity (Abraham Bae, Louay N. Mohammad, Samuel B. Cooper, Jr., and William King, Jr.), Jan., 58

**Corrosion**
Corrosion of Rebar and Role of Fiber Reinforced Concrete (Manote Sappakittipakorn and Nemkumar Banthia), Jan., 127

**Cost**
Optimization Analysis of the Machine Repair Problem with Balking and Variable Number of Servers (Kuo-Hsiung Wang, Yuh-Ching Liou, and Dong-Yuh Yang), Nov., 907

**Crack**
Elliptical Hole-Crack Problems in an Infinite Plate Subjected to Internal Pressure (Xiangqiao Yan and Chengqing Miao), Jul., 531

**Crack opening displacement $\delta$ stable tearing**
Multiple-method CTOA Stable Tearing Characterization of Three Metallic Alloys (Elizabeth Frink and Kevin Lease), Nov., 875

**Crack tip opening angle**
Multiple-method CTOA Stable Tearing Characterization of Three Metallic Alloys (Elizabeth Frink and Kevin Lease), Nov., 875

**Cracking**
Corrosion of Rebar and Role of Fiber Reinforced Concrete (Manote Sappakittipakorn and Nemkumar Banthia), Jan., 127

**Crack-tip element**
Elliptical Hole-Crack Problems in an Infinite Plate Subjected to Internal Pressure (Xiangqiao Yan and Chengqing Miao), Jul., 531

**Creep**
The Creep Testing Apparatus (CRETA): A New Testing Device for Measuring the Viscoelasticity of Joint Sealant (Qiang Li, Raphael W. Crowley, David B. Bloomquist, and Reynaldo Roque), May, 387

**Creep behavior**
Application of Digital Image Correlation Technique in Experimental Study of the Creep Behavior and Time Dependent Damage of Natural Rock Salt (Diansen Yang, Weizhong Chen, Jianping Yang, and Guojun Wu), March, 220

**Creep deformation**
Measurement of Creep-induced Change of Dynamic Stiffness of Resilient Materials Used for Impact Sound Isolation in Floating Floors (Tongjun Cho), Jul., 661

**Critical strain measurement**
Experimental Bend Tests to Study Mechanical Descaling of Hot-Rolled Steel Rod (Wengai Yang, YaoHou Li, and Christopher Michael Sellars), Jul., 570

**Cross section**
Characterizing Profiled Fibers by Multiscale Shape Representations (RongWu Wang, LiPing Tang, PeiFeng Zeng, and BuGao Xu), May, 435

**Crumb-rubber modifier**
High-Temperature Viscosity Performance of Crumb-Rubber-Modified Binder With

Warm Mix Asphalt Additives (Hainian Wang, Zhengxia Dang, Zhanping You, and Dongwei Cao), Sep., 687

**Crushing test**
Degradation Behavior and Mechanism of HMA Aggregate (Tao Ma, Xiaoming Huang, Yongli Zhao, Hao Yuan, and Xin Ma), Sep., 697

**Curricular studies**
Middle School Science and Items of High School Entrance Examination: Examining the Gap in Turkey (Salih Cepni, Yilmaz Kara, and Emine Cil), May, 501

**Curve fitting**
Novel Error Prediction Method of Dynamic Measurement Lacking Information (Ge Leyi, Zhao Wei, Huang Songling, and Zhou Jing), Jan., 37

**Customer retention**
Measurement of Switching Cost on the Customer Retention in the Banking Industry (Yi-Hsien Wang, Kuang-Hsun Shih, and Ya-Chi Huang), Nov., 923

**D**

**Damage criteria**
Comparison of Damage Criteria for Structures to Near-Field Blast-Induced Ground Motions (D. Mehmet Özcan, Alemdar Bayraktar, and Ahmet Can Altunişik), Jan., 148

**Damping parameter**
Evaluation of Epoxy Asphalt Concrete Damping Parameters Using Impact Resonance Test (Leilei Chen, Zhendong Qian, and Lei Zhang), Sep., 853

**Data mining**
An Integral Predictive Model of Financial Distress (Mushang Lee and Tsui-Chih Wu), Nov., 931

**Decision tree**
An Integral Predictive Model of Financial Distress (Mushang Lee and Tsui-Chih Wu), Nov., 931

**Degradation**
Degradation Behavior and Mechanism of HMA Aggregate (Tao Ma, Xiaoming Huang, Yongli Zhao, Hao Yuan, and Xin Ma), Sep., 697

**Deicer**
Development of Standard Laboratory Testing Procedures to Evaluate the Performance of Deicers (Michelle Akin and Xianming Shi), Nov., 1015

**Deicing chemicals**
Evaluation of Ice-Melting Capacities of Deicing Chemicals (B. M. Gerbino-Bevins, C. Y. Tuan, and M. Mattison), Nov., 952
Development of Standard Laboratory Testing Procedures to Evaluate the Performance of Deicers (Michelle Akin and Xianming Shi), Nov., 1015

**Delamination**
Correlation Analysis of 2D Tomographic Images for Flaw Detection in Pavements (Kyle Hoegh and Lev Khazanovich), March, 247

**Deterioration**
Correlation Analysis of 2D Tomographic Images for Flaw Detection in Pavements (Kyle Hoegh and Lev Khazanovich), March, 247

**Deterioration process**
Performance Evaluation and Loss Measures for the Deterioration Process (Ming-Hung Shu and Peng-Jen Chen), May, 454

**Diagnostics**
Correlation Analysis of 2D Tomographic Images for Flaw Detection in Pavements (Kyle Hoegh and Lev Khazanovich), March, 247

**Differential scanning calorimetry (DSC)**
Development of Standard Laboratory Testing Procedures to Evaluate the Performance of Deicers (Michelle Akin and Xianming Shi), Nov., 1015

**Digital image correlation**
Application of Digital Image Correlation Technique in Experimental Study of the Creep Behavior and Time Dependent Damage of Natural Rock Salt (Diansen Yang, Weizhong Chen, Jianping Yang, and Guojun Wu), March, 220
Development of a Robust Stereo-PIV System for 3-D Soil Deformation Measurement (Bingxiang Yuan, Jinyuan Liu, Wenwu Chen, and Kaiwen Xia), March, 256

**Direct methods**
Characterization of Carbon Black Particles Mixing in Polymeric Matrix by Direct Methods (Zhao-Hui Jiang, Jian Jin, Chang-Fa Xiao, Xin Li, and Ling-Xi Kong), March, 227

**Directional flame thermometers**
What Have We Learned About Uncertainty? Are We Still Playing with Fire? (Ned Keltner), Jan., 24

**Dispersion**
Characterization of Carbon Black Particles Mixing in Polymeric Matrix by Direct Methods (Zhao-Hui Jiang, Jian Jin, Chang-Fa Xiao, Xin Li, and Ling-Xi Kong), March, 227

**Displacement discontinuity method**
Elliptical Hole-Crack Problems in an Infinite Plate Subjected to Internal Pressure (Xiangqiao Yan and Chengqing Miao), Jul., 531

**Distance between rollers**
Comparative Analysis of Brake Data of Vehicles on Two Different Ministry of Transport Brake Roller Testers (C. Senabre, E. Velasco, and S. Valero), Jul., 597

**Distribution**
Characterization of Carbon Black Particles Mixing in Polymeric Matrix by Direct Methods (Zhao-Hui Jiang, Jian Jin, Chang-Fa Xiao, Xin Li, and Ling-Xi Kong), March, 227

**Distribution-free**
A Standby System with General Repair and Imperfect Switching (Jau-Chuan Ke, Stéphane M. F. Yen, Tzu-Hsin Liu, and Ying-Lin Hsu), May, 440

**Disturbed state concept**
Using Disturbed State Concept to Predict the Stress–Strain Response of Concrete Attacked by Sulfate (Yanfeng Nie and Chunxiang Qian), Sep., 761

**Drying and wetting paths**
Influence of Drying and Wetting Cycles on SWCCs of Fine-Grained Soils (Sneha Jayanth, Kannan Iyer, and D. N. Singh), May, 376

**DSR**
Nonlinear Response Characterization of Bituminous Mortar (M. F. Woldekidan, M. Huurman, and L. T. Mo), Sep., 768

**Durability**
Corrosion of Rebar and Role of Fiber Reinforced Concrete (Manote Sappakittipakorn and Nemkumar Banthia), Jan., 127
Evaluation of Durability of Stabilized Clay Specimens Using Different Laboratory Procedures (Roy Khalife, Pranshoo Solanki, and Musharraf M. Zaman), May, 363

**Dynamic**
Development of a Novel Test Rig for the Evaluation of Aircraft Fuel Tank Sealant (M. N. Hooper, A. R. Hutchinson, J. G. Broughton, and M. A. Taylor), Jan., 177

**Dynamic assessment**
A New Method for Threat Assessment and Uncertainty Analysis of Air-Raid-Target-Based on Connection Number (Yong-Guang Chen, Hong-Fa Ke, and Ke He), Nov., 1033

**Dynamic measurement**
Novel Error Prediction Method of Dynamic Measurement Lacking Information (Ge Leyi, Zhao Wei, Huang Songling, and Zhou Jing), Jan., 37

**Dynamic modulus**
Rheological and Rutting Characterization of Asphalt Mixes with Modified Binders (S. Anjan kumar and A. Veeraragavan), Jan., 66
A Practical Dynamic Modulus Testing Protocol (Xinjun Li and R. Christopher Williams), Jan., 100
Comprehensive Evaluation of Small Strain Viscoelastic Behavior of Asphalt Concrete (B. Shane Underwood and Y. Richard Kim), Jul., 622
Comparison of Dynamic Moduli for Asphalt Mixtures Determined from

Different Geometries and Compactions (Andrew Lacroix, Y. Richard Kim, and Consuelo Arellano), Nov., 1006

**Dynamic shear rheometer**
Research of Bituminous MortarFatigue Test Method Based on Dynamic Shear Rheometer (L. T. Mo, M. Huurman, S. P. Wu, and A. A. A. Molenaar), Jan., 84
Correlation of Flow Number with Stiffness Obtained from Dynamic Shear Rheometer Testing of Extracted Binder from Asphalt Concrete Containing Recycled Asphalt Pavement (Alex K. Apeagyei and Stacey D. Diefenderfer), Jul., 612

**Dynamic stiffness**
Measurement of Creep-induced Change of Dynamic Stiffness of Resilient Materials Used for Impact Sound Isolation in Floating Floors (Tongjun Cho), Jul., 661

E

**Early age shrinkage**
Time Zero Value Based on S-Wave Reflection Loss Measurement for Early Age Shrinkage Monitoring of Cementitious Specimens Subjected to Sealed and Unsealed Curing Conditions (K. C. G. Ong and L. R. Chandra), May, 395

**Early-age concrete**
Investigation on Characteristics of Internal Structure of Early-age Concrete by Non-destructive Testing (Zhonghe Shui, Sha Ding, Wei Chen, Kai Li, and Jianxin Lu), Sep., 814

**Ecology**
Examining Polymerization of Kaolinitic Concrete Using Scanning Electron Microscopy and Raman Spectroscopy (Chin-kun Kuo, Edward H. Wang, and Chao-Lung Hwang), Nov., 975

**Eddy-current testing**
In Situ Eddy-Current Testing on Low-Pressure Turbine Blades of Aircraft Engine (Gong-Jin Qi, Hong Lei, Gang-Qiang Fu, Peng Jing, and Jun-Ming Lin), Jul., 553

**Elastic modulus**
A New Method for Strain Measurement in the Tensile Testing of Filamentous Materials (Mengxi Huang, Fuqi Wu, Ziran Li, and Yuanming Xia), Nov., 890

**Electrical conductance**
Moisture Meter Calibrations for Untreated and ACQ-Treated Southern Yellow Pine Lumber and Plywood (C. R. Boardman, Samuel V. Glass, and Charles G. Carll), Jan., 184

**Electronic control device**
Evaluation of the Long-Distance Conducted Electrical Weapon XREP® (Sebastian N. Kunz, Matthias Graw, Oliver Peschel, and Nico Grove), March, 281

**Elevated temperatures and low temperatures**
Responses of Austenitic Stainless Steel American Iron and Steel Institute (AISI) 303 (1.4305) Subjected to Different Environmental Conditions (Josip Brnic, Goran Turkalj, Marko Canadija, Domagoj Lanc, and Sanjin Krscanski), March, 319

**Embedded conductor**
Solving an Inverse Scattering Problem of an Embedded Perfectly Conducting Cylinder by Asynchronous Particle Swarm Optimization (Chien-Ching Chiu, Jung-Chin Hsu, and Wei-Chun Hsiao), Nov., 896

**Emulsifying platform**
Comparative Study on Laboratory Performance of Hot- and Warm-mix Asphalt Mixtures (Yiqiu Tan, Meng Guo, Huining Xu, and Rui Zhang), Sep., 715

**Entry mode**
Evaluating the Entry Mode for Taiwan Insurance Companies by Using AHP Sensitivity (Elaine Ho and Chun Yueh Lin), May, 476

**Environmental**
Development of a Novel Test Rig for the Evaluation of Aircraft Fuel Tank Sealant (M. N. Hooper, A. R. Hutchinson, J. G. Broughton, and M. A. Taylor), Jan., 177

**Epoxy asphalt concrete**
Evaluation of Epoxy Asphalt Concrete Damping Parameters Using Impact Resonance Test (Leilei Chen, Zhendong Qian, and Lei Zhang), Sep., 853

**Ethylenediamine**
Solvothermal Synthesis of High Yield CdS Nanowires in Ethylenediamine (Zhang Hui, Song Guojun, and Li Jianjiang), May, 491

**Expansive clay**
Recent Developments in the Swelling Model of Expansive Clays for Pavement-Heave Calculations (Moshe Livneh), March, 310

**Explosive engineering**
Elliptical Hole-Crack Problems in an Infinite Plate Subjected to Internal Pressure (Xiangqiao Yan and Chengqing Miao), Jul., 531

**Extraction and recovery**
Correlation of Flow Number with Stiffness Obtained from Dynamic Shear Rheometer Testing of Extracted Binder from Asphalt Concrete Containing Recycled Asphalt Pavement (Alex K. Apeagyei and Stacey D. Diefenderfer), Jul., 612

F

**Failure data**
Reliability Evaluation of Failure Data with Poor Information (Xintao Xia), Jul., 565

**Falling weight deflectometer**
Trial Grouting under Rigid Pavement: A Case History in Magong Airport, Penghu (James C. Ni and Wen-Chieh Cheng), Jan., 107

**Fatigue**
Research of Bituminous MortarFatigue Test Method Based on Dynamic Shear Rheometer (L. T. Mo, M. Huurman, S. P. Wu, and A. A. A. Molenaar), Jan., 84
A Linear *S-N* Curve with Load Dependent Variance and Explicit Failure Probability (Venkata Rambabu Dabiru and Anindya Chatterjee), Jul., 557

**Fatigue crack**
Fatigue Crack Assessment of Asphalt Concrete Pavement on a Single Span Highway Bridge Subjected to a Moving Truck (Youngguk Seo, Cheolmin Baek, and Y. Richard Kim), Nov., 983

**Fatigue property**
Properties of Asphalt Mixtures Containing Various Fibers (Qunshan Ye and Hongxin Guan), Sep., 708

**FE-SEM**
Microstructure Characterization of Mesoporous Materials by FE-SEM (Wu Wei, Liu Ziwei, Hua Jiajie, Zeng Yi, and Li Yongsheng), May, 496

**Fiber conglutination**
Characterizing Profiled Fibers by Multiscale Shape Representations (RongWu Wang, LiPing Tang, PeiFeng Zeng, and BuGao Xu), May, 435

**Fiber content**
Determination of Optimum Fiber Content in a Fiber-Reinforced Clay (Behzad Amir-Faryar and M. Sherif Aggour), March, 334

**Fiber modifier**
Properties of Asphalt Mixtures Containing Various Fibers (Qunshan Ye and Hongxin Guan), Sep., 708

**Fiber-reinforced concrete**
Corrosion of Rebar and Role of Fiber Reinforced Concrete (Manote Sappakittipakorn and Nemkumar Banthia), Jan., 127

**Fibrillated**
Determination of Optimum Fiber Content in a Fiber-Reinforced Clay (Behzad Amir-Faryar and M. Sherif Aggour), March, 334

**Field samples**
Comparison of Dynamic Moduli for Asphalt Mixtures Determined from Different Geometries and Compactions (Andrew Lacroix, Y. Richard Kim, and Consuelo Arellano), Nov., 1006

**Filamentous materials**
A New Method for Strain Measurement in the Tensile Testing of Filamentous Materials (Mengxi Huang, Fuqi Wu, Ziran Li, and Yuanming Xia), Nov., 890

**Financial service marketing**
Measurement of Switching Cost on the Customer Retention in the Banking Industry (Yi-Hsien Wang, Kuang-Hsun Shih, and Ya-Chi Huang), Nov., 923

**Financial-distress-prediction model**
An Integral Predictive Model of Financial Distress (Mushang Lee and Tsui-Chih Wu), Nov., 931

**Fine-grained soils**
Influence of Drying and Wetting Cycles on SWCCs of Fine-Grained Soils (Sneha Jayanth, Kannan Iyer, and D. N. Singh), May, 376

**Finite element method (FEM)**
A New Method for Numerical Analysis of Reinforced Soil (Yu-xin Jie, Bin Zhang, and Guang-xin Li), Jul., 586

**Fire experiments**
Fire Pattern Repeatability: A Study in Uncertainty (Daniel Madrzykowski and Charles Fleischmann), Jan., 1

**Fire investigation**
Fire Pattern Repeatability: A Study in Uncertainty (Daniel Madrzykowski and Charles Fleischmann), Jan., 1

**Fire models**
Uncertainty in Fire Protection Engineering Design (Morgan J. Hurley), Jan., 12

**Fire patterns**
Fire Pattern Repeatability: A Study in Uncertainty (Daniel Madrzykowski and Charles Fleischmann), Jan., 1

**Fire performance**
Investigation on the Flammability of Diverse Cast PA6 Semi-Finished Products (M. Andó, T. Czigány, and G. Kalácska), Nov., 1027

**Fire resistance**
What Have We Learned About Uncertainty? Are We Still Playing with Fire? (Ned Keltner), Jan., 24

**Fire risk assessment**
Who Gets the Benefit of the Doubt From Uncertainty? (John R. Hall, Jr.), Jan., 18

**Fire test**
Development of a Proposed ASTM Guide to Continued Applicability of Reports on Fire Test Standards (Timothy T. Earl and Marcelo M. Hirschler), Jan., 52

**Fire test response standard**
Development of a Proposed ASTM Guide to Continued Applicability of Reports on Fire Test Standards (Timothy T. Earl and Marcelo M. Hirschler), Jan., 52

**Fire test standard**
Who Gets the Benefit of the Doubt From Uncertainty? (John R. Hall, Jr.), Jan., 18

**Fisher information matrix**
Parameters Estimation Under Step-Stress Life Test Based on Censored Data From Generalized Exponential Model (Ali A. Ismail and S. E. Abu-Youssef), March, 305

**Flame height**
Fire Pattern Repeatability: A Study in Uncertainty (Daniel Madrzykowski and Charles Fleischmann), Jan., 1

**Floating floor**
Measurement of Creep-induced Change of Dynamic Stiffness of Resilient Materials Used for Impact Sound Isolation in Floating Floors (Tongjun Cho), Jul., 661

**Flow number**
Correlation of Flow Number with Stiffness Obtained from Dynamic Shear Rheometer Testing of Extracted Binder from Asphalt Concrete Containing Recycled Asphalt Pavement (Alex K. Apeagyei and Stacey D. Diefenderfer), Jul., 612

**Flow spread**
Time-Dependent Rheological Changes of Fly Ash Blended Cement Paste (Wei Chen, Zhonghe Shui, and Jianfeng Fan), Sep., 822

**Fly ash**
Evaluation of Bentonite-Fly Ash Mix for Its Application in Landfill Liners (M. M. Younus and S. Sreedeep), May, 357
Evaluation of Durability of Stabilized Clay Specimens Using Different Laboratory Procedures (Roy Khalife, Pranshoo Solanki, and Musharraf M. Zaman), May, 363
Time-Dependent Rheological Changes of Fly Ash Blended Cement Paste (Wei Chen, Zhonghe Shui, and Jianfeng Fan), Sep., 822

**Form**
Comparison of Shape Parameters for Selected Coarse Aggregates in Oklahoma (Dharamveer Singh, Musharraf Zaman, and Sesh Commuri), May, 409

**Fourier transform infrared spectroscopy**
Effect of Layered Double Hydroxides (LDHs) on Aging Properties of Bitumen (Yongfang Huang, Zhengang Feng, Henglong Zhang, and Jianying Yu), Sep., 734

**Fracture toughness ($K_{IC}$)**
Fracture-Toughness Evaluation in Submerged Arc-Welding Seam Welds in Nonstandard Curved SE(B) Specimens in the Short Radial Direction of API 5L Steel Pipe (D. Angeles-Herrera, J. González-Velázquez, and A. J. de Morales-Ramírez), Nov., 886

**Fracture toughness assessment**
Responses of Austenitic Stainless Steel American Iron and Steel Institute (AISI) 303 (1.4305) Subjected to Different Environmental Conditions (Josip Brnic, Goran Turkalj, Marko Canadija, Domagoj Lanc, and Sanjin Krscanski), March, 319

**Freezing experiments**
Experimental Testing and Numerical Evaluation on Freezing for Water Hydraulics Application under Sub-Freezing Ambient Temperature Environment (Patrick S. K. Chua, F. L. Tan, and J. Zhang), Jan., 137

**Frequency domain decomposition**
System Identification of a Reinforced Concrete Building Using the Complex Mode Indicator Function and the Hilbert Transform Techniques (Pelin Gundes Bakir, Ender M. Eksioglu, and Serhat Alkan), May, 427

**Fuel tank**
Development of a Novel Test Rig for the Evaluation of Aircraft Fuel Tank Sealant (M. N. Hooper, A. R. Hutchinson, J. G. Broughton, and M. A. Taylor), Jan., 177

**Full-field strain**
Application of Digital Image Correlation Technique in Experimental Study of the Creep Behavior and Time Dependent Damage of Natural Rock Salt (Diansen Yang, Weizhong Chen, Jianping Yang, and Guojun Wu), March, 220

## G

**Galvanic current**
Corrosion of Rebar and Role of Fiber Reinforced Concrete (Manote Sappakittipakorn and Nemkumar Banthia), Jan., 127

**Gamma distribution**
Designing of Group Sampling Plans Based on Gamma-Poisson Distribution (Muhammad Aslam, Saminathan Balamurali, Chi-Hyuck Jun, Munir Ahmad, and Mujahid Rasool), Nov., 939

**Gauge repeatability and reproducibility**
A Gauge Study for Dynamic Light Scattering and Differential Mobility Analyzer Instruments (F. K. Wang, H. L. Chern, and T. C. Yu), Jul., 580

**General loss function**
Performance Evaluation and Loss Measures for the Deterioration Process (Ming-Hung Shu and Peng-Jen Chen), May, 454

**Generalized exponential distribution**
Parameters Estimation Under Step-Stress Life Test Based on Censored Data From Generalized Exponential Model (Ali A. Ismail and S. E. Abu-Youssef), March, 305

**Geometry**
Comparison of Dynamic Moduli for Asphalt Mixtures Determined from Different Geometries and Compactions (Andrew Lacroix, Y. Richard Kim, and Consuelo Arellano), Nov., 1006

**Geopolymer**
Examining Polymerization of Kaolinitic Concrete Using Scanning Electron Microscopy and Raman Spectroscopy (Chin-kun Kuo, Edward H. Wang, and Chao-Lung Hwang), Nov., 975

**Geosynthetics**
A New Method for Numerical Analysis of Reinforced Soil (Yu-xin Jie, Bin Zhang, and Guang-xin Li), Jul., 586

**Geotechnical engineering**
Development of a Robust Stereo-PIV System for 3-D Soil Deformation Measurement (Bingxiang Yuan, Jinyuan Liu, Wenwu Chen, and Kaiwen Xia), March, 256

**Glass**
Computer-Controlled Stable Crack Growth as a Reliable and Fast Method to Determine Subcritical Crack Growth (Hüseyin Özcoban, Theo Fett, and Gerold A. Schneider), March, 238

**Gradation**
Degradation Behavior and Mechanism of HMA Aggregate (Tao Ma, Xiaoming Huang, Yongli Zhao, Hao Yuan, and Xin Ma), Sep., 697

**Granulated blast furnace slag**
Application of the Steam Aging Method to Evaluate the Long-Term Performance of Secondary Materials for Road Construction (S. Akbarnejad, L. J. M. Houben, and A. A. A. Molenaar), Sep., 754

**Graphite**
Investigation on the Flammability of Diverse Cast PA6 Semi-Finished Products (M. Andó, T. Czigány, and G. Kalácska), Nov., 1027

**Green purchasing**
A Green Purchasing Model by Using ANP and LP Methods (Chin-Tsai Lin, Chie-Bein Chen, and Ying-Chan Ting), March, 203

**Grey situation decision making**
Constructing an Evaluation Model for Agenting Online Games (Hao-En Chueh and Che-Wei Chang), March, 243

**Grey system theory**
Novel Error Prediction Method of Dynamic Measurement Lacking Information (Ge Leyi, Zhao Wei, Huang Songling, and Zhou Jing), Jan., 37

**Grinding wheel**
Precision Tool Condition Monitoring for Grinding Wheel in IC Manufacturing of Silicon Wafer (Ya-Chen Hsu, W. L. Pearn, and Ya-Fei Chuang), Nov., 916

**Grip tester**
A Comparison Study of Friction Measurements for Chip Seal (Jusang Lee, Jaejun Lee, Y. Richard Kim, and Sungho Mun), Jul., 603

**Ground penetrating radar**
Trial Grouting under Rigid Pavement: A Case History in Magong Airport, Penghu (James C. Ni and Wen-Chieh Cheng), Jan., 107
Investigation on Characteristics of Internal Structure of Early-age Concrete by Non-destructive Testing (Zhonghe Shui, Sha Ding, Wei Chen, Kai Li, and Jianxin Lu), Sep., 814

**Group sampling**
Designing of Group Sampling Plans Based on Gamma-Poisson Distribution (Muhammad Aslam, Saminathan Balamurali, Chi-Hyuck Jun, Munir Ahmad, and Mujahid Rasool), Nov., 939

**Gyratory compactor**
Estimation of Optimum Compaction Temperature for PMA and WMA Mixtures by Volumetric Property Evaluation (Moon-Sup Lee, Sungun Kim, and Kwang W. Kim), May, 463

H

**Half-cell potential**
Corrosion of Rebar and Role of Fiber Reinforced Concrete (Manote Sappakittipakorn and Nemkumar Banthia), Jan., 127

**Heat flux**
What Have We Learned About Uncertainty? Are We Still Playing with Fire? (Ned Keltner), Jan., 24

**Heat reflective coating**
Effectiveness of Solar Heat Reflective Coatings in Reducing Asphalt Concrete Temperature (Zheng Chen and Dengcheng Ma), Sep., 740

**Heat release rate**
Fire Pattern Repeatability: A Study in Uncertainty (Daniel Madrzykowski and Charles Fleischmann), Jan., 1

**Heave**
Recent Developments in the Swelling Model of Expansive Clays for Pavement-Heave Calculations (Moshe Livneh), March, 310

**Heteroscedasticity**
A Linear *S-N* Curve with Load Dependent Variance and Explicit Failure Probability (Venkata Rambabu Dabiru and Anindya Chatterjee), Jul., 557

**High temperature**
Experimental Procedure for the Mechanical Evaluation of Oxide-Carbon Refractories by Strain Measurement (V. Muñoz, G. A. Rohr, A. L. Cavalieri, and A. G. Tomba Martinez), Jan., 194

**High yield**
Solvothermal Synthesis of High Yield CdS Nanowires in Ethylenediamine (Zhang Hui, Song Guojun, and Li Jianjiang), May, 491

**High-performance anion chromatography**
Dissolving Behavior of Carbohydrate Ingredients During Pre-Extraction Process of Alkaline Hydrogen Peroxide of Bamboos (Xueping Song, Hui He, Zhi Li, Qing Wang, and Shuangfei Wang), May, 343

**Hilbert-Huang transform (HHT)**
Application of Hilbert-Huang Transform to Inertial Profile Verification: A Laboratory Approach (Mei-Hui Lee and Chia-Pei Chou), Jan., 165

**HMA**
Degradation Behavior and Mechanism of HMA Aggregate (Tao Ma, Xiaoming Huang, Yongli Zhao, Hao Yuan, and Xin Ma), Sep., 697

**Hole**
Elliptical Hole-Crack Problems in an Infinite Plate Subjected to Internal Pressure (Xiangqiao Yan and Chengqing Miao), Jul., 531

**Hole-crack**
Elliptical Hole-Crack Problems in an Infinite Plate Subjected to Internal Pressure (Xiangqiao Yan and Chengqing Miao), Jul., 531

**Hollomon**
Computation of Tensile Strain-Hardening Exponents through the Power-Law Relationship (Ariel E. Matusevich, Julio C. Massa, and Reinaldo A. Mancini), Jul., 521

**Hot mix asphalt**
Mechanical Characteristics of Asphaltic Mixtures Containing Titanium-Dioxide Photocatalyst (Louay Mohammad, Marwa Hassan, and Sam Cooper III), Nov., 998

**Hot-rolled steel rod**
Experimental Bend Tests to Study Mechanical Descaling of Hot-Rolled Steel Rod (Wengai Yang, YaoHou Li, and Christopher Michael Sellars), Jul., 570

**Hydraulic conductivity**
Evaluation of Bentonite-Fly Ash Mix for Its Application in Landfill Liners (M. M. Younus and S. Sreedeep), May, 357

**Hypothesis test**
A Standby System with General Repair and Imperfect Switching (Jau-Chuan Ke, Stéphane M. F. Yen, Tzu-Hsin Liu, and Ying-Lin Hsu), May, 440

I

**Ice-melting capacities**
Evaluation of Ice-Melting Capacities of Deicing Chemicals (B. M. Gerbino-Bevins, C. Y. Tuan, and M. Mattison), Nov., 952

**Impact echo**
Investigation on Characteristics of Internal Structure of Early-age Concrete by Non-destructive Testing (Zhonghe Shui, Sha Ding, Wei Chen, Kai Li, and Jianxin Lu), Sep., 814

**Impact load**
Evaluation of Epoxy Asphalt Concrete Damping Parameters Using Impact Resonance Test (Leilei Chen, Zhendong Qian, and Lei Zhang), Sep., 853

**Impact resistance**
Determining Performance of Marble Finished Products on Their Usage Areas by a New Impact-Resistance Test Method (Gencay Sariisik), Nov., 945

**Impact resonance test**
Evaluation of Epoxy Asphalt Concrete Damping Parameters Using Impact Resonance Test (Leilei Chen, Zhendong Qian, and Lei Zhang), Sep., 853

**Imperfect switch**
A Standby System with General Repair and Imperfect Switching (Jau-Chuan Ke, Stéphane M. F. Yen, Tzu-Hsin Liu, and Ying-Lin Hsu), May, 440

**In situ**
In Situ Eddy-Current Testing on Low-Pressure Turbine Blades of Aircraft Engine (Gong-Jin Qi, Hong Lei, Gang-Qiang Fu, Peng Jing, and Jun-Ming Lin), Jul., 553

**Inertia**
Measurement of Switching Cost on the Customer Retention in the Banking Industry (Yi-Hsien Wang, Kuang-Hsun Shih, and Ya-Chi Huang), Nov., 923

**Inertial profiler**
Application of Hilbert-Huang Transform to Inertial Profile Verification: A Laboratory Approach (Mei-Hui Lee and Chia-Pei Chou), Jan., 165

**Information poor system**
Reliability Evaluation of Failure Data with Poor Information (Xintao Xia), Jul., 565

**Infrastructure**
Correlation Analysis of 2D Tomographic Images for Flaw Detection in Pavements (Kyle Hoegh and Lev Khazanovich), March, 247

**Inhomogeneity**
Inhomogeneity Screening Criterion for the ASTM E1921 $T_0$ Estimate Based on the SINTAP Lower-Tail Methodology (Kim R. W. Wallin), Nov., 867

**Insulation**
Experimental Testing and Numerical Evaluation on Freezing for Water Hydraulics Application under Sub-Freezing Ambient Temperature Environment (Patrick S. K. Chua, F. L. Tan, and J. Zhang), Jan., 137

**Insurance industry**
Evaluating the Entry Mode for Taiwan Insurance Companies by Using AHP Sensitivity (Elaine Ho and Chun Yueh Lin), May, 476

**Intelligent compaction**
Characterizing the Precision Uncertainty in Vibratory Roller Measurement Values (Norman W. Facas and Michael A. Mooney), Jan., 43

**Interface**
Investigation of Interaction between the Silicone Rubber Sealant and Concrete Substrate (Jiesheng Liu, Shaopeng Wu, and Haijun Lu), Sep., 801

**Interfacial layer**
Shrinkage-induced Damage Evolution for Concrete Overlay (Guiming Wang, Yun Kong, Zhanqi Guo, Zhonghe Shui, and Zheng Leng), Sep., 784

**Inverse algorithm**
Testing of a Bridge Weigh-in-Motion Algorithm Utilising Multiple Longitudinal Sensor Locations (Arturo González, Jason Dowling, Eugene J. O'Brien, and Aleš Znidarič), Nov., 961

**Inverse method**
Comparison of Tensile Properties of Strain Hardening Cementitious Composite Cured in Normal and Accelerated Conditions (Shunzhi Qian and Zhigang Zhang), Sep., 778

**Inverse scattering**
Solving an Inverse Scattering Problem of an Embedded Perfectly Conducting Cylinder by Asynchronous Particle Swarm Optimization (Chien-Ching Chiu, Jung-Chin Hsu, and Wei-Chun Hsiao), Nov., 896

**Ion-exchange**
Chloride Binding Capacity of Cement Paste Containing Layered Double Hydroxide (LDH) (Shui Zhonghe, Ma Juntao, Chen Wei, and Chen Xiaoxing), Sep., 796

**ISO 10 275**
Computation of Tensile Strain-Hardening Exponents through the Power-Law Relationship (Ariel E. Matusevich, Julio C. Massa, and Reinaldo A. Mancini), Jul., 521

**J**

**Joint confidence blocks**
A Study of Process Quality Assessment for Golf Club-Shaft in Leisure Sport Industries (Kuen-Suan Chen, Hsi-Tien Chen, and Ching-Hsin Wang), May, 512

**Joint sealant**
The Creep Testing Apparatus (CRETA): A New Testing Device for Measuring the Viscoelasticity of Joint Sealant (Qiang Li, Raphael W. Crowley, David B. Bloomquist, and Reynaldo Roque), May, 387

**K**

**Kinematic viscosity**
Estimation of Optimum Compaction Temperature for PMA and WMA Mixtures by Volumetric Property Evaluation (Moon-Sup Lee, Sungun Kim, and Kwang W. Kim), May, 463

**L**

**Laboratory automation system**
The Development and Evaluation of Blood Volume Measuring System for Blood Culture Quality Improvement (Hun Shim, Kab Seung Kim, Young Uh, Dong Min Seo, Hyo Youl Kim, and Young Ro Yoon), Jul., 655

**Laboratory compaction**
Evaluating Laboratory Compaction of Asphalt Mixtures Using the Shear Box Compactor (J. Qiu, N. Li, F.P. Pramesti, M.F.C. van de Ven, and A.A.A. Molenaar), Sep., 844

**Laboratory evaluation**
Development of Standard Laboratory Testing Procedures to Evaluate the Performance of Deicers (Michelle Akin and Xianming Shi), Nov., 1015

**Laboratory method**
Application of Hilbert-Huang Transform to Inertial Profile Verification: A Laboratory Approach (Mei-Hui Lee and Chia-Pei Chou), Jan., 165

**Landfill liners**
Evaluation of Bentonite-Fly Ash Mix for Its Application in Landfill Liners (M. M. Younus and S. Sreedeep), May, 357

**Large-scale examinations**
Middle School Science and Items of High School Entrance Examination: Examining the Gap in Turkey (Salih Cepni, Yilmaz Kara, and Emine Cil), May, 501

**Layered double hydroxides**
Effect of Layered Double Hydroxides (LDHs) on Aging Properties of Bitumen (Yongfang Huang, Zhengang Feng, Henglong Zhang, and Jianying Yu), Sep., 734
Chloride Binding Capacity of Cement Paste Containing Layered Double Hydroxide (LDH) (Shui Zhonghe, Ma Juntao, Chen Wei, and Chen Xiaoxing), Sep., 796

**LED assembly**
Evaluating Process Yield for LED Assembly under Undetected Process Parameter Change (Y. T. Tai), May, 485

**Likelihood ratio**
Parameters Estimation Under Step-Stress Life Test Based on Censored Data From Generalized Exponential Model (Ali A. Ismail and S. E. Abu-Youssef), March, 305

**Lime**
Evaluation of Durability of Stabilized Clay Specimens Using Different Laboratory Procedures (Roy Khalife, Pranshoo Solanki, and Musharraf M. Zaman), May, 363

**Linear polarization resistance**
Corrosion of Rebar and Role of Fiber Reinforced Concrete (Manote Sappakittipakorn and Nemkumar Banthia), Jan., 127

**Liner viscoelasticity**
The Creep Testing Apparatus (CRETA): A New Testing Device for Measuring the Viscoelasticity of Joint Sealant (Qiang Li,

Raphael W. Crowley, David B. Bloomquist, and Reynaldo Roque), May, 387

**Load dependent variance**
A Linear *S-N* Curve with Load Dependent Variance and Explicit Failure Probability (Venkata Rambabu Dabiru and Anindya Chatterjee), Jul., 557

**Locked-wheel skid test**
A Comparison Study of Friction Measurements for Chip Seal (Jusang Lee, Jaejun Lee, Y. Richard Kim, and Sungho Mun), Jul., 603

**Logistic regression**
An Integral Predictive Model of Financial Distress (Mushang Lee and Tsui-Chih Wu), Nov., 931

**Long distance conducted electrical weapon**
Evaluation of the Long-Distance Conducted Electrical Weapon XREP® (Sebastian N. Kunz, Matthias Graw, Oliver Peschel, and Nico Grove), March, 281

**Low cycle fatigue (LCF)**
Low Cycle Fatigue Experiments on Turbogenerator Steels and a New Method for Defining Confidence Bands (Giorgio Olmi), Jul., 539

**Lower confidence bound**
Implementation of Evaluating Process Capability Index $C_{pk}$ for Processes with Multiple Characteristics (W. L. Pearn and C. H. Wu), Jul., 643

**LP**
A Green Purchasing Model by Using ANP and LP Methods (Chin-Tsai Lin, Chie-Bein Chen, and Ying-Chan Ting), March, 203

**M**

**Marble finished products**
Determining Performance of Marble Finished Products on Their Usage Areas by a New Impact-Resistance Test Method (Gencay Sariisik), Nov., 945

**Marshall compactor**
Degradation Behavior and Mechanism of HMA Aggregate (Tao Ma, Xiaoming Huang, Yongli Zhao, Hao Yuan, and Xin Ma), Sep., 697

**Master curve**
A Practical Dynamic Modulus Testing Protocol (Xinjun Li and R. Christopher Williams), Jan., 100
Inhomogeneity Screening Criterion for the ASTM E1921 $T_0$ Estimate Based on the SINTAP Lower-Tail Methodology (Kim R. W. Wallin), Nov., 867

**Material characteristics**
An Alternative Approach to Determine Material Characteristics Using Spherical Indentation and Neural Networks for Bulk Metals (A. H. Mahmoudi, S. H. Nourbakhsh, and R. Amali), March, 211

**Material testing**
Investigation on the Flammability of Diverse Cast PA6 Semi-Finished Products (M. Andó, T. Czigány, and G. Kalácska), Nov., 1027

**Maximum and minimum principal stresses**
Comparison of Damage Criteria for Structures to Near-Field Blast-Induced Ground Motions (D. Mehmet Özcan, Alemdar Bayraktar, and Ahmet Can Altunişik), Jan., 148

**Maximum likelihood estimator**
Parameters Estimation Under Step-Stress Life Test Based on Censored Data From Generalized Exponential Model (Ali A. Ismail and S. E. Abu-Youssef), March, 305

**Mean shift**
An Effective Procedure for Calculating Weibull Production Yield with Mean Shift (Ya-Chen Hsu, W. L. Pearn, and Yuan-Yi Li), May, 447

**Mean square error**
Parameters Estimation Under Step-Stress Life Test Based on Censored Data From Generalized Exponential Model (Ali A. Ismail and S. E. Abu-Youssef), March, 305

**Measurement**
The Assessment of Hand Volume Using a Modified Volumetric Technique (Kavin K. W. Tsang, Grant E. Norte, and James W. Hand), March, 329

**Mechanical descaling**
Experimental Bend Tests to Study Mechanical Descaling of Hot-Rolled Steel Rod (Wengai Yang, YaoHou Li, and Christopher Michael Sellars), Jul., 570

**Mechanical impedance**
Mechanical Impedance Measurement on Thin Layer Surface With Impedance Hammer Device (Mingliang Li, A. A. A. Molenaar, M. F. C. van de Ven, and Wim van Keulen), Sep., 860

**Mechanical properties**
Computer-Controlled Stable Crack Growth as a Reliable and Fast Method to Determine Subcritical Crack Growth (Hüseyin Özcoban, Theo Fett, and Gerold A. Schneider), March, 238
Responses of Austenitic Stainless Steel American Iron and Steel Institute (AISI) 303 (1.4305) Subjected to Different Environmental Conditions (Josip Brnic, Goran Turkalj, Marko Canadija, Domagoj Lanc, and Sanjin Krscanski), March, 319
Effect of Phase-Change Materials on Thermal and Mechanical Properties of Asphalt Mixtures (Meizhu Chen, Lu Wan, and Juntao Lin), Sep., 746

**Mesoporous materials**
Microstructure Characterization of Mesoporous Materials by FE-SEM (Wu Wei, Liu Ziwei, Hua Jiajie, Zeng Yi, and Li Yongsheng), May, 496

**Meso-scale**
Research of Bituminous MortarFatigue Test Method Based on Dynamic Shear Rheometer (L. T. Mo, M. Huurman, S. P. Wu, and A. A. A. Molenaar), Jan., 84

**Metakaolin (MK)**
Examining Polymerization of Kaolinitic Concrete Using Scanning Electron Microscopy and Raman Spectroscopy (Chin-kun Kuo, Edward H. Wang, and Chao-Lung Hwang), Nov., 975

**Metal deposited (MD)**
Fracture-Toughness Evaluation in Submerged Arc-Welding Seam Welds in Non-standard Curved SE(B) Specimens in the Short Radial Direction of API 5L Steel Pipe (D. Angeles-Herrera, J. González-Velázquez, and A. J. de Morales-Ramírez), Nov., 886

**Metallic materials**
Computation of Tensile Strain-Hardening Exponents through the Power-Law Relationship (Ariel E. Matusevich, Julio C. Massa, and Reinaldo A. Mancini), Jul., 521

**Ministry of Transport (MOT)**
Comparative Analysis of Brake Data of Vehicles on Two Different Ministry of Transport Brake Roller Testers (C. Senabre, E. Velasco, and S. Valero), Jul., 597

**Mix proportion design**
Comparative Study on Laboratory Performance of Hot- and Warm-mix Asphalt Mixtures (Yiqiu Tan, Meng Guo, Huining Xu, and Rui Zhang), Sep., 715

**Mixed model**
A Gauge Study for Dynamic Light Scattering and Differential Mobility Analyzer Instruments (F. K. Wang, H. L. Chern, and T. C. Yu), Jul., 580

**Mixing temperature**
High-Temperature Viscosity Performance of Crumb-Rubber-Modified Binder With Warm Mix Asphalt Additives (Hainian Wang, Zhengxia Dang, Zhanping You, and Dongwei Cao), Sep., 687

**Model validation**
Uncertainty in Fire Protection Engineering Design (Morgan J. Hurley), Jan., 12

**Modified asphalt binder**
Rheological and Rutting Characterization of Asphalt Mixes with Modified Binders (S. Anjan kumar and A. Veeraragavan), Jan., 66

**Moisture content**
Moisture Meter Calibrations for Untreated and ACQ-Treated Southern Yellow Pine Lumber and Plywood (C. R. Boardman, Samuel V. Glass, and Charles G. Carll), Jan., 184

**Moisture meter**
Moisture Meter Calibrations for Untreated and ACQ-Treated Southern Yellow Pine Lumber and Plywood (C. R. Boardman, Samuel V. Glass, and Charles G. Carll), Jan., 184

**Moisture susceptibility**
Effects of an Amine Anti-Stripping Agent on Moisture Susceptibility of Sasobit and Aspha-Min Mixes by Surface Free Energy Analysis (Aravinda Buddhala, Zahid Hossain, Nazimuddin M. Wasiuddin, Musharraf Zaman, and Edgar A. O'Rear), Jan., 91

**Monofilament**
Determination of Optimum Fiber Content in a Fiber-Reinforced Clay (Behzad Amir-Faryar and M. Sherif Aggour), March, 334

**Monte Carlo simulation**
Parameters Estimation Under Step-Stress Life Test Based on Censored Data From Generalized Exponential Model (Ali A. Ismail and S. E. Abu-Youssef), March, 305

**Montmorillonite**
Study on the Intrinsic Viscosity of Bitumen Containing Organo Montmorillonite Nanoclay (Gang Liu, Martin van de Ven, Shaopeng Wu, and Andre Molenaar), Sep., 833
Investigation on the Flammability of Diverse Cast PA6 Semi-Finished Products (M. Andó, T. Czigány, and G. Kalácska), Nov., 1027

**Mortar**
Research of Bituminous MortarFatigue Test Method Based on Dynamic Shear Rheometer (L. T. Mo, M. Huurman, S. P. Wu, and A. A. A. Molenaar), Jan., 84

**Mortar response**
Nonlinear Response Characterization of Bituminous Mortar (M. F. Woldekidan, M. Huurman, and L. T. Mo), Sep., 768

**Multiple characteristics**
An Effective Powerful Test for Supplier Selection Evaluation with Multiple Characteristics (W. L. Pearn, Y. T. Tai, and C. Y. Wang), Jul., 633

N

***N*-values**
Computation of Tensile Strain-Hardening Exponents through the Power-Law Relationship (Ariel E. Matusevich, Julio C. Massa, and Reinaldo A. Mancini), Jul., 521

**Nanoparticles**
A Gauge Study for Dynamic Light Scattering and Differential Mobility Analyzer Instruments (F. K. Wang, H. L. Chern, and T. C. Yu), Jul., 580

**NDT**
Correlation Analysis of 2D Tomographic Images for Flaw Detection in Pavements (Kyle Hoegh and Lev Khazanovich), March, 247

**Near-field blast-induced ground motion**
Comparison of Damage Criteria for Structures to Near-Field Blast-Induced Ground Motions (D. Mehmet Özcan, Alemdar Bayraktar, and Ahmet Can Altunişik), Jan., 148

**Neural network**
An Integral Predictive Model of Financial Distress (Mushang Lee and Tsui-Chih Wu), Nov., 931

**Neural networks**
An Alternative Approach to Determine Material Characteristics Using Spherical Indentation and Neural Networks for Bulk Metals (A. H. Mahmoudi, S. H. Nourbakhsh, and R. Amali), March, 211

**New method**
Determining Performance of Marble Finished Products on Their Usage Areas by a New Impact-Resistance Test Method (Gencay Sariisik), Nov., 945

**Newton's method**
Optimization Analysis of the Machine Repair Problem with Balking and Variable Number of Servers (Kuo-Hsiung Wang, Yuh-Ching Liou, and Dong-Yuh Yang), Nov., 907

**Newton-Raphson**
Parameters Estimation Under Step-Stress Life Test Based on Censored Data From Generalized Exponential Model (Ali A. Ismail and S. E. Abu-Youssef), March, 305

**NIR spectroscopy**
Non-contact and Non-destructive Analysis of the Quality of Phenolic Resin by Near-Infrared Spectroscopy (Y. Dong and S. Y. Qu), March, 302

**Nominal-the-best type with symmetric tolerance**
A Study of Process Quality Assessment for Golf Club-Shaft in Leisure Sport Industries (Kuen-Suan Chen, Hsi-Tien Chen, and Ching-Hsin Wang), May, 512

**Non-destructive testing**
Time Zero Value Based on S-Wave Reflection Loss Measurement for Early Age Shrinkage Monitoring of Cementitious Specimens Subjected to Sealed and Unsealed Curing Conditions (K. C. G. Ong and L. R. Chandra), May, 395

**Nonlinear behavior**
Nonlinear Response Characterization of Bituminous Mortar (M. F. Woldekidan, M. Huurman, and L. T. Mo), Sep., 768

**Nonlinear dynamic analyses**
Comparison of Damage Criteria for Structures to Near-Field Blast-Induced Ground Motions (D. Mehmet Özcan, Alemdar Bayraktar, and Ahmet Can Altunişik), Jan., 148

**Non-normal**
An Effective Procedure for Calculating Weibull Production Yield with Mean Shift (Ya-Chen Hsu, W. L. Pearn, and Yuan-Yi Li), May, 447

**Normal propyl bromide**
Correlation of Flow Number with Stiffness Obtained from Dynamic Shear Rheometer Testing of Extracted Binder from Asphalt Concrete Containing Recycled Asphalt Pavement (Alex K. Apeagyei and Stacey D. Diefenderfer), Jul., 612

**Nugget**
Characterizing the Precision Uncertainty in Vibratory Roller Measurement Values (Norman W. Facas and Michael A. Mooney), Jan., 43

**Numerical simulation**
Experimental Testing and Numerical Evaluation on Freezing for Water Hydraulics Application under Sub-Freezing Ambient Temperature Environment (Patrick S. K. Chua, F. L. Tan, and J. Zhang), Jan., 137

O

**Online game**
Constructing an Evaluation Model for Agenting Online Games (Hao-En Chueh and Che-Wei Chang), March, 243

**Optimization**
Optimization Analysis of the Machine Repair Problem with Balking and Variable Number of Servers (Kuo-Hsiung Wang, Yuh-Ching Liou, and Dong-Yuh Yang), Nov., 907
Testing of a Bridge Weigh-in-Motion Algorithm Utilising Multiple Longitudinal Sensor Locations (Arturo González, Jason Dowling, Eugene J. O'Brien, and Aleš Znidarič), Nov., 961

**Optimum compaction temperature**
Estimation of Optimum Compaction Temperature for PMA and WMA Mixtures by Volumetric Property Evaluation (Moon-Sup Lee, Sungun Kim, and Kwang W. Kim), May, 463

**Order allocation**
A Green Purchasing Model by Using ANP and LP Methods (Chin-Tsai Lin, Chie-Bein Chen, and Ying-Chan Ting), March, 203

**Output only modal analysis**
System Identification of a Reinforced Concrete Building Using the Complex Mode Indicator Function and the Hilbert Transform Techniques (Pelin Gundes Bakir, Ender M. Eksioglu, and Serhat Alkan), May, 427

**Overlay**
Shrinkage-induced Damage Evolution for Concrete Overlay (Guiming Wang, Yun Kong, Zhanqi Guo, Zhonghe Shui, and Zheng Leng), Sep., 784

**Oxide scale**
Experimental Bend Tests to Study Mechanical Descaling of Hot-Rolled Steel Rod

(Wengai Yang, YaoHou Li, and Christopher Michael Sellars), Jul., 570

**Oxide-C refractories**
Experimental Procedure for the Mechanical Evaluation of Oxide-Carbon Refractories by Strain Measurement (V. Muñoz, G. A. Rohr, A. L. Cavalieri, and A. G. Tomba Martinez), Jan., 194

**P**

**Paper web**
A Note on Wet Paper Web Adhesion Strength (S. Edvardsson, P. A. Gradin, P. Isaksson, and M. Gulliksson), Jul., 682

**Parameter change**
Evaluating Process Yield for LED Assembly under Undetected Process Parameter Change (Y. T. Tai), May, 485

**Partial acceleration**
Parameters Estimation Under Step-Stress Life Test Based on Censored Data From Generalized Exponential Model (Ali A. Ismail and S. E. Abu-Youssef), March, 305

**Partial least-squares regression**
Non-contact and Non-destructive Analysis of the Quality of Phenolic Resin by Near-Infrared Spectroscopy (Y. Dong and S. Y. Qu), March, 302

**Particle image velocimetry**
Development of a Robust Stereo-PIV System for 3-D Soil Deformation Measurement (Bingxiang Yuan, Jinyuan Liu, Wenwu Chen, and Kaiwen Xia), March, 256

**Pavement performance**
Effectiveness of Solar Heat Reflective Coatings in Reducing Asphalt Concrete Temperature (Zheng Chen and Dengcheng Ma), Sep., 740

**Peak particle velocity**
Comparison of Damage Criteria for Structures to Near-Field Blast-Induced Ground Motions (D. Mehmet Özcan, Alemdar Bayraktar, and Ahmet Can Altunişik), Jan., 148

**Peeling test**
A Note on Wet Paper Web Adhesion Strength (S. Edvardsson, P. A. Gradin, P. Isaksson, and M. Gulliksson), Jul., 682

**Penetration resistance**
Time Zero Value Based on S-Wave Reflection Loss Measurement for Early Age Shrinkage Monitoring of Cementitious Specimens Subjected to Sealed and Unsealed Curing Conditions (K. C. G. Ong and L. R. Chandra), May, 395

**Performance**
Effect of Silicone Maintenance Materials on Asphalt Binders and Mixtures (Juntao Lin, Meizhu Chen, Lu Wan, and and Shaopeng Wu), Jan., 78

**Performance evaluation**
Evaluation of Bentonite-Fly Ash Mix for Its Application in Landfill Liners (M. M. Younus and S. Sreedeep), May, 357
Performance Evaluation and Loss Measures for the Deterioration Process (Ming-Hung Shu and Peng-Jen Chen), May, 454

**Performance grade**
Effects of Additives for Warm Mix Asphalt on Performance Grades of Asphalt Binders (Chaofan Wu and Menglan Zeng), March, 265

**Phase-change material**
Effect of Phase-Change Materials on Thermal and Mechanical Properties of Asphalt Mixtures (Meizhu Chen, Lu Wan, and Juntao Lin), Sep., 746

**Phenolic resin**
Non-contact and Non-destructive Analysis of the Quality of Phenolic Resin by Near-Infrared Spectroscopy (Y. Dong and S. Y. Qu), March, 302

**Photo-thermal coupled aging**
A Study on Photo-thermal Coupled Aging Kinetics of Bitumen (Hui Wang, Zhengang Feng, Bo Zhou, and Jianying Yu), Sep., 724

**Physical and mechanical properties**
Determining Performance of Marble Finished Products on Their Usage Areas by a New Impact-Resistance Test Method (Gencay Sariisik), Nov., 945

**Plywood**
Moisture Meter Calibrations for Untreated and ACQ-Treated Southern Yellow Pine Lumber and Plywood (C. R. Boardman, Samuel V. Glass, and Charles G. Carll), Jan., 184

**Poisson distribution**
Designing of Group Sampling Plans Based on Gamma-Poisson Distribution (Muhammad Aslam, Saminathan Balamurali, Chi-Hyuck Jun, Munir Ahmad, and Mujahid Rasool), Nov., 939

**Polyamide 6**
Investigation on the Flammability of Diverse Cast PA6 Semi-Finished Products (M. Andó, T. Czigány, and G. Kalácska), Nov., 1027

**Polymer-modified asphalt**
Estimation of Optimum Compaction Temperature for PMA and WMA Mixtures by Volumetric Property Evaluation (Moon-Sup Lee, Sungun Kim, and Kwang W. Kim), May, 463

**Polypropylene**
Characterization of Carbon Black Particles Mixing in Polymeric Matrix by Direct Methods (Zhao-Hui Jiang, Jian Jin, Chang-Fa Xiao, Xin Li, and Ling-Xi Kong), March, 227

**Polypropylene fiber**
Determination of Optimum Fiber Content in a Fiber-Reinforced Clay (Behzad Amir-Faryar and M. Sherif Aggour), March, 334

**Pool fires**
What Have We Learned About Uncertainty? Are We Still Playing with Fire? (Ned Keltner), Jan., 24

**Porous asphalt**
Nonlinear Response Characterization of Bituminous Mortar (M. F. Woldekidan, M. Huurman, and L. T. Mo), Sep., 768

**Power function**
A Standby System with General Repair and Imperfect Switching (Jau-Chuan Ke, Stéphane M. F. Yen, Tzu-Hsin Liu, and Ying-Lin Hsu), May, 440

**Precision**
Characterizing the Precision Uncertainty in Vibratory Roller Measurement Values (Norman W. Facas and Michael A. Mooney), Jan., 43
Evaluation of Various Test Devices for the Measurements of Aggregates and Asphalt Mixtures Specific Gravity (Abraham Bae, Louay N. Mohammad, Samuel B. Cooper, Jr., and William King, Jr.), Jan., 58

**Precision and bias**
Application of Hilbert-Huang Transform to Inertial Profile Verification: A Laboratory Approach (Mei-Hui Lee and Chia-Pei Chou), Jan., 165

**Pre-extraction**
Dissolving Behavior of Carbohydrate Ingredients During Pre-Extraction Process of Alkaline Hydrogen Peroxide of Bamboos (Xueping Song, Hui He, Zhi Li, Qing Wang, and Shuangfei Wang), May, 343
Characterizations of Bamboo Succus And Alkaline Peroxide Mechanical Pulping (APMP) Brightness of Bambusa Chungii (Xueping Song, Lianxin Luo, Qing Wang, and Shuangfei Wang), May, 349

**Pressurized fluids**
Experimental Testing and Numerical Evaluation on Freezing for Water Hydraulics Application under Sub-Freezing Ambient Temperature Environment (Patrick S. K. Chua, F. L. Tan, and J. Zhang), Jan., 137

**Process capability index**
An Effective Procedure for Calculating Weibull Production Yield with Mean Shift (Ya-Chen Hsu, W. L. Pearn, and Yuan-Yi Li), May, 447
Precision Tool Condition Monitoring for Grinding Wheel in IC Manufacturing of Silicon Wafer (Ya-Chen Hsu, W. L. Pearn, and Ya-Fei Chuang), Nov., 916

**Process quality index**
A Study of Process Quality Assessment for Golf Club-Shaft in Leisure Sport Industries (Kuen-Suan Chen, Hsi-Tien Chen, and Ching-Hsin Wang), May, 512

**Process quality zone**
A Study of Process Quality Assessment for Golf Club-Shaft in Leisure Sport Industries (Kuen-Suan Chen, Hsi-Tien Chen, and Ching-Hsin Wang), May, 512

**Process yield**
Evaluating Process Yield for LED Assembly under Undetected Process Parameter Change (Y. T. Tai), May, 485

**Producer's risk**
Designing of Group Sampling Plans Based on Gamma-Poisson Distribution (Muhammad Aslam, Saminathan Balamurali, Chi-Hyuck Jun, Munir Ahmad, and Mujahid Rasool), Nov., 939

**Production yield**
An Effective Procedure for Calculating Weibull Production Yield with Mean Shift (Ya-Chen Hsu, W. L. Pearn, and Yuan-Yi Li), May, 447
Implementation of Evaluating Process Capability Index $C_{pk}$ for Processes with Multiple Characteristics (W. L. Pearn and C. H. Wu), Jul., 643

**Profiled fiber**
Characterizing Profiled Fibers by Multi-scale Shape Representations (RongWu Wang, LiPing Tang, PeiFeng Zeng, and BuGao Xu), May, 435

Q

**Quantitative**
Characterization of Carbon Black Particles Mixing in Polymeric Matrix by Direct Methods (Zhao-Hui Jiang, Jian Jin, Chang-Fa Xiao, Xin Li, and Ling-Xi Kong), March, 227

R

**Raman spectroscopy (RS)**
Examining Polymerization of Kaolinitic Concrete Using Scanning Electron Microscopy and Raman Spectroscopy (Chin-kun Kuo, Edward H. Wang, and Chao-Lung Hwang), Nov., 975

**Rapid quality control method**
Comparison of Tensile Properties of Strain Hardening Cementitious Composite Cured in Normal and Accelerated Conditions (Shunzhi Qian and Zhigang Zhang), Sep., 778

**Recycled asphalt pavement**
Correlation of Flow Number with Stiffness Obtained from Dynamic Shear Rheometer Testing of Extracted Binder from Asphalt Concrete Containing Recycled Asphalt Pavement (Alex K. Apeagyei and Stacey D. Diefenderfer), Jul., 612

**Reduce temperature**
Effectiveness of Solar Heat Reflective Coatings in Reducing Asphalt Concrete Temperature (Zheng Chen and Dengcheng Ma), Sep., 740

**Reinforced soil**
A New Method for Numerical Analysis of Reinforced Soil (Yu-xin Jie, Bin Zhang, and Guang-xin Li), Jul., 586

**Reliability**
Reliability Evaluation of Failure Data with Poor Information (Xintao Xia), Jul., 565

**Resilient material**
Measurement of Creep-induced Change of Dynamic Stiffness of Resilient Materials Used for Impact Sound Isolation in Floating Floors (Tongjun Cho), Jul., 661

**Resilient modulus**
Evaluation of Durability of Stabilized Clay Specimens Using Different Laboratory Procedures (Roy Khalife, Pranshoo Solanki, and Musharraf M. Zaman), May, 363

**Resistance**
Moisture Meter Calibrations for Untreated and ACQ-Treated Southern Yellow Pine Lumber and Plywood (C. R. Boardman, Samuel V. Glass, and Charles G. Carll), Jan., 184

**Rheological property**
Performance Evaluation of SBS Modified Asphalt with Different Anti-aging Additives (Zhengang Feng, Song Xu, Yubin Sun, and Jianying Yu), Sep., 728

**Rheology**
Rheological and Rutting Characterization of Asphalt Mixes with Modified Binders (S. Anjan kumar and A. Veeraragavan), Jan., 66
Time-Dependent Rheological Changes of Fly Ash Blended Cement Paste (Wei Chen, Zhonghe Shui, and Jianfeng Fan), Sep., 822

**Rigid pavement**
Trial Grouting under Rigid Pavement: A Case History in Magong Airport, Penghu (James C. Ni and Wen-Chieh Cheng), Jan., 107

**Road base**
Application of the Steam Aging Method to Evaluate the Long-Term Performance of Secondary Materials for Road Construction (S. Akbarnejad, L. J. M. Houben, and A. A. A. Molenaar), Sep., 754

**Road performance**
Comparative Study on Laboratory Performance of Hot- and Warm-mix Asphalt Mixtures (Yiqiu Tan, Meng Guo, Huining Xu, and Rui Zhang), Sep., 715

**Roasted**
Chloride Binding Capacity of Cement Paste Containing Layered Double Hydroxide (LDH) (Shui Zhonghe, Ma Juntao, Chen Wei, and Chen Xiaoxing), Sep., 796

**Rock salt**
Application of Digital Image Correlation Technique in Experimental Study of the Creep Behavior and Time Dependent Damage of Natural Rock Salt (Diansen Yang, Weizhong Chen, Jianping Yang, and Guojun Wu), March, 220

**Roller bed**
Comparative Analysis of Brake Data of Vehicles on Two Different Ministry of Transport Brake Roller Testers (C. Senabre, E. Velasco, and S. Valero), Jul., 597

**Rotor**
Low Cycle Fatigue Experiments on Turbogenerator Steels and a New Method for Defining Confidence Bands (Giorgio Olmi), Jul., 539

**Rough set**
An Integral Predictive Model of Financial Distress (Mushang Lee and Tsui-Chih Wu), Nov., 931

**Rubber–asphalt binder**
High-Temperature Viscosity Performance of Crumb-Rubber-Modified Binder With Warm Mix Asphalt Additives (Hainian Wang, Zhengxia Dang, Zhanping You, and Dongwei Cao), Sep., 687

**Rutting**
Rheological and Rutting Characterization of Asphalt Mixes with Modified Binders (S. Anjan kumar and A. Veeraragavan), Jan., 66
Correlation of Flow Number with Stiffness Obtained from Dynamic Shear Rheometer Testing of Extracted Binder from Asphalt Concrete Containing Recycled Asphalt Pavement (Alex K. Apeagyei and Stacey D. Diefenderfer), Jul., 612

**Rutting resistance**
Properties of Asphalt Mixtures Containing Various Fibers (Qunshan Ye and Hongxin Guan), Sep., 708

S

***S-N* curve**
A Linear *S-N* Curve with Load Dependent Variance and Explicit Failure Probability (Venkata Rambabu Dabiru and Anindya Chatterjee), Jul., 557

**Sample size**
Recent Developments in the Swelling Model of Expansive Clays for Pavement-Heave Calculations (Moshe Livneh), March, 310

**Sasobit**
Effects of an Amine Anti-Stripping Agent on Moisture Susceptibility of Sasobit and Aspha-Min Mixes by Surface Free Energy Analysis (Aravinda Buddhala, Zahid Hossain, Nazimuddin M. Wasiuddin, Musharraf Zaman, and Edgar A. O'Rear), Jan., 91

**SBS modified asphalt**
Performance Evaluation of SBS Modified Asphalt with Different Anti-aging

Additives (Zhengang Feng, Song Xu, Yubin Sun, and Jianying Yu), Sep., 728

**Scanning electron microscopy (SEM)**
Examining Polymerization of Kaolinitic Concrete Using Scanning Electron Microscopy and Raman Spectroscopy (Chin-kun Kuo, Edward H. Wang, and Chao-Lung Hwang), Nov., 975

**Screening criteria**
Inhomogeneity Screening Criterion for the ASTM E1921 $T_0$ Estimate Based on the SINTAP Lower-Tail Methodology (Kim R. W. Wallin), Nov., 867

**Sealant**
Development of a Novel Test Rig for the Evaluation of Aircraft Fuel Tank Sealant (M. N. Hooper, A. R. Hutchinson, J. G. Broughton, and M. A. Taylor), Jan., 177

**Secondary materials**
Application of the Steam Aging Method to Evaluate the Long-Term Performance of Secondary Materials for Road Construction (S. Akbarnejad, L. J. M. Houben, and A. A. A. Molenaar), Sep., 754

**Sensing properties**
Sensing Properties of Carbon Nanotube–Carbon Fiber/Cement Nanocomposites (Junqing Zuo, Wu Yao, Xiaoyan Liu, and Junjie Qin), Sep., 838

**Sensitivity analysis**
Evaluating the Entry Mode for Taiwan Insurance Companies by Using AHP Sensitivity (Elaine Ho and Chun Yueh Lin), May, 476

**Sessile drop**
Application of Sessile Drop Method to Determine Surface Free Energy of Asphalt and Aggregate (Jianming Wei and Yuzhen Zhang), Sep., 807

**Set-pair analysis**
A New Method for Threat Assessment and Uncertainty Analysis of Air-Raid-Target-Based on Connection Number (Yong-Guang Chen, Hong-Fa Ke, and Ke He), Nov., 1033

**Setup time determination**
Performance Evaluation and Loss Measures for the Deterioration Process (Ming-Hung Shu and Peng-Jen Chen), May, 454

**Shear box compactor**
Evaluating Laboratory Compaction of Asphalt Mixtures Using the Shear Box Compactor (J. Qiu, N. Li, F.P. Pramesti, M.F.C. van de Ven, and A.A.A. Molenaar), Sep., 844

**Shear stress**
Evaluating Laboratory Compaction of Asphalt Mixtures Using the Shear Box Compactor (J. Qiu, N. Li, F.P. Pramesti, M.F.C. van de Ven, and A.A.A. Molenaar), Sep., 844

**Sheet formability**
Computation of Tensile Strain-Hardening Exponents through the Power-Law Relationship (Ariel E. Matusevich, Julio C. Massa, and Reinaldo A. Mancini), Jul., 521

**Short radial direction (SR)**
Fracture-Toughness Evaluation in Submerged Arc-Welding Seam Welds in Nonstandard Curved SE(B) Specimens in the Short Radial Direction of API 5L Steel Pipe (D. Angeles-Herrera, J. González-Velázquez, and A. J. de Morales-Ramírez), Nov., 886

**Short-time creep behavior**
Responses of Austenitic Stainless Steel American Iron and Steel Institute (AISI) 303 (1.4305) Subjected to Different Environmental Conditions (Josip Brnic, Goran Turkalj, Marko Canadija, Domagoj Lanc, and Sanjin Krscanski), March, 319

**Shrinkage**
Shrinkage-induced Damage Evolution for Concrete Overlay (Guiming Wang, Yun Kong, Zhanqi Guo, Zhonghe Shui, and Zheng Leng), Sep., 784

**SHRP ice melting test**
Development of Standard Laboratory Testing Procedures to Evaluate the Performance of Deicers (Michelle Akin and Xianming Shi), Nov., 1015

**Silicon wafer**
Precision Tool Condition Monitoring for Grinding Wheel in IC Manufacturing of Silicon Wafer (Ya-Chen Hsu, W. L. Pearn, and Ya-Fei Chuang), Nov., 916

**Silicone**
The Creep Testing Apparatus (CRETA): A New Testing Device for Measuring the Viscoelasticity of Joint Sealant (Qiang Li, Raphael W. Crowley, David B. Bloomquist, and Reynaldo Roque), May, 387

**Silicone maintenance materials**
Effect of Silicone Maintenance Materials on Asphalt Binders and Mixtures (Juntao Lin, Meizhu Chen, Lu Wan, and and Shaopeng Wu), Jan., 78

**Silicone rubber sealant**
Investigation of Interaction between the Silicone Rubber Sealant and Concrete Substrate (Jiesheng Liu, Shaopeng Wu, and Haijun Lu), Sep., 801

**Simple performance tests**
Correlation of Flow Number with Stiffness Obtained from Dynamic Shear Rheometer Testing of Extracted Binder from Asphalt Concrete Containing Recycled Asphalt Pavement (Alex K. Apeagyei and Stacey D. Diefenderfer), Jul., 612

**Simulation**
A Standby System with General Repair and Imperfect Switching (Jau-Chuan Ke, Stéphane M. F. Yen, Tzu-Hsin Liu, and Ying-Lin Hsu), May, 440

Shrinkage-induced Damage Evolution for Concrete Overlay (Guiming Wang, Yun Kong, Zhanqi Guo, Zhonghe Shui, and Zheng Leng), Sep., 784

**Singular value decomposition**
System Identification of a Reinforced Concrete Building Using the Complex Mode Indicator Function and the Hilbert Transform Techniques (Pelin Gundes Bakir, Ender M. Eksioglu, and Serhat Alkan), May, 427

**SINTAP lower-tail method**
Inhomogeneity Screening Criterion for the ASTM E1921 $T_0$ Estimate Based on the SINTAP Lower-Tail Methodology (Kim R. W. Wallin), Nov., 867

**Skid resistance**
A Comparison Study of Friction Measurements for Chip Seal (Jusang Lee, Jaejun Lee, Y. Richard Kim, and Sungho Mun), Jul., 603

**Slab stabilization**
Trial Grouting under Rigid Pavement: A Case History in Magong Airport, Penghu (James C. Ni and Wen-Chieh Cheng), Jan., 107

**Small sample**
Reliability Evaluation of Failure Data with Poor Information (Xintao Xia), Jul., 565

**Smaller-the-better type**
A Study of Process Quality Assessment for Golf Club-Shaft in Leisure Sport Industries (Kuen-Suan Chen, Hsi-Tien Chen, and Ching-Hsin Wang), May, 512

**Software evaluation model**
Constructing an Evaluation Model for Agenting Online Games (Hao-En Chueh and Che-Wei Chang), March, 243

**Soil suction**
Influence of Drying and Wetting Cycles on SWCCs of Fine-Grained Soils (Sneha Jayanth, Kannan Iyer, and D. N. Singh), May, 376

**Soil-water characteristic curve**
Influence of Drying and Wetting Cycles on SWCCs of Fine-Grained Soils (Sneha Jayanth, Kannan Iyer, and D. N. Singh), May, 376

**Solvothermal method**
Solvothermal Synthesis of High Yield CdS Nanowires in Ethylenediamine (Zhang Hui, Song Guojun, and Li Jianjiang), May, 491

**Southern yellow pine**
Moisture Meter Calibrations for Untreated and ACQ-Treated Southern Yellow Pine Lumber and Plywood (C. R. Boardman, Samuel V. Glass, and Charles G. Carll), Jan., 184

**Specific gravity**
Evaluation of Various Test Devices for the Measurements of Aggregates and Asphalt

Mixtures Specific Gravity (Abraham Bae, Louay N. Mohammad, Samuel B. Cooper, Jr., and William King, Jr.), Jan., 58

**Specimen extension error**
A New Method for Strain Measurement in the Tensile Testing of Filamentous Materials (Mengxi Huang, Fuqi Wu, Ziran Li, and Yuanming Xia), Nov., 890

**Spherical indentation**
An Alternative Approach to Determine Material Characteristics Using Spherical Indentation and Neural Networks for Bulk Metals (A. H. Mahmoudi, S. H. Nourbakhsh, and R. Amali), March, 211

**Sphericity**
Comparison of Shape Parameters for Selected Coarse Aggregates in Oklahoma (Dharamveer Singh, Musharraf Zaman, and Sesh Commuri), May, 409

**SSDetect**
Evaluation of Various Test Devices for the Measurements of Aggregates and Asphalt Mixtures Specific Gravity (Abraham Bae, Louay N. Mohammad, Samuel B. Cooper, Jr., and William King, Jr.), Jan., 58

**Stable crack growth**
Computer-Controlled Stable Crack Growth as a Reliable and Fast Method to Determine Subcritical Crack Growth (Hüseyin Özcoban, Theo Fett, and Gerold A. Schneider), March, 238

**Standard test protocol**
Development of Standard Laboratory Testing Procedures to Evaluate the Performance of Deicers (Michelle Akin and Xianming Shi), Nov., 1015

**Standby**
A Standby System with General Repair and Imperfect Switching (Jau-Chuan Ke, Stéphane M. F. Yen, Tzu-Hsin Liu, and Ying-Lin Hsu), May, 440

**Statistical analysis**
Laboratory Evaluation of Warm Mix Asphalt Influence on Theoretical Maximum Specific Gravity (Jianhua Yu, R. Christopher Williams, and Ashley F. Buss), Jul., 669

**Statistical significance**
Who Gets the Benefit of the Doubt From Uncertainty? (John R. Hall, Jr.), Jan., 18

**Steel bridge deck pavement**
Evaluation of Epoxy Asphalt Concrete Damping Parameters Using Impact Resonance Test (Leilei Chen, Zhendong Qian, and Lei Zhang), Sep., 853

**Stepwise regression**
An Integral Predictive Model of Financial Distress (Mushang Lee and Tsui-Chih Wu), Nov., 931

**Stereo-PIV**
Development of a Robust Stereo-PIV System for 3-D Soil Deformation Measurement (Bingxiang Yuan, Jinyuan Liu, Wenwu Chen, and Kaiwen Xia), March, 256

**Stone mastic asphalt**
Fatigue Crack Assessment of Asphalt Concrete Pavement on a Single Span Highway Bridge Subjected to a Moving Truck (Youngguk Seo, Cheolmin Baek, and Y. Richard Kim), Nov., 983

**Storage stability**
High-Temperature Viscosity Performance of Crumb-Rubber-Modified Binder With Warm Mix Asphalt Additives (Hainian Wang, Zhengxia Dang, Zhanping You, and Dongwei Cao), Sep., 687

**Strain hardening cementitious composite (SHCC)**
Comparison of Tensile Properties of Strain Hardening Cementitious Composite Cured in Normal and Accelerated Conditions (Shunzhi Qian and Zhigang Zhang), Sep., 778

**Strength**
Evaluation of Bentonite-Fly Ash Mix for Its Application in Landfill Liners (M. M. Younus and S. Sreedeep), May, 357

**Stress intensity factor**
Elliptical Hole-Crack Problems in an Infinite Plate Subjected to Internal Pressure (Xiangqiao Yan and Chengqing Miao), Jul., 531

**Stress–strain curve**
Using Disturbed State Concept to Predict the Stress–Strain Response of Concrete Attacked by Sulfate (Yanfeng Nie and Chunxiang Qian), Sep., 761

**Stress-strain curves**
Experimental Procedure for the Mechanical Evaluation of Oxide-Carbon Refractories by Strain Measurement (V. Muñoz, G. A. Rohr, A. L. Cavalieri, and A. G. Tomba Martinez), Jan., 194

**Stress-strain relationship**
A New Method for Numerical Analysis of Reinforced Soil (Yu-xin Jie, Bin Zhang, and Guang-xin Li), Jul., 586

**Structural damage**
Comparison of Damage Criteria for Structures to Near-Field Blast-Induced Ground Motions (D. Mehmet Özcan, Alemdar Bayraktar, and Ahmet Can Altunişik), Jan., 148

**Subcritical crack growth**
Computer-Controlled Stable Crack Growth as a Reliable and Fast Method to Determine Subcritical Crack Growth (Hüseyin Özcoban, Theo Fett, and Gerold A. Schneider), March, 238

**Sub-freezing temperature**
Experimental Testing and Numerical Evaluation on Freezing for Water Hydraulics Application under Sub-Freezing Ambient Temperature Environment (Patrick S. K. Chua, F. L. Tan, and J. Zhang), Jan., 137

**Subgrade**
Evaluation of Durability of Stabilized Clay Specimens Using Different Laboratory Procedures (Roy Khalife, Pranshoo Solanki, and Musharraf M. Zaman), May, 363

**Submerged arc welding (SAW)**
Fracture-Toughness Evaluation in Submerged Arc-Welding Seam Welds in Nonstandard Curved SE(B) Specimens in the Short Radial Direction of API 5L Steel Pipe (D. Angeles-Herrera, J. González-Velázquez, and A. J. de Morales-Ramírez), Nov., 886

**Substrate**
Investigation of Interaction between the Silicone Rubber Sealant and Concrete Substrate (Jiesheng Liu, Shaopeng Wu, and Haijun Lu), Sep., 801

**Sugar dissolution rate**
Dissolving Behavior of Carbohydrate Ingredients During Pre-Extraction Process of Alkaline Hydrogen Peroxide of Bamboos (Xueping Song, Hui He, Zhi Li, Qing Wang, and Shuangfei Wang), May, 343

**Sulfate**
Using Disturbed State Concept to Predict the Stress–Strain Response of Concrete Attacked by Sulfate (Yanfeng Nie and Chunxiang Qian), Sep., 761

**Superpave gyratory compactor**
Degradation Behavior and Mechanism of HMA Aggregate (Tao Ma, Xiaoming Huang, Yongli Zhao, Hao Yuan, and Xin Ma), Sep., 697

**Supplier selection**
A Green Purchasing Model by Using ANP and LP Methods (Chin-Tsai Lin, Chie-Bein Chen, and Ying-Chan Ting), March, 203

**Supplier selection evaluation**
An Effective Powerful Test for Supplier Selection Evaluation with Multiple Characteristics (W. L. Pearn, Y. T. Tai, and C. Y. Wang), Jul., 633

**Surface free energy**
Application of Sessile Drop Method to Determine Surface Free Energy of Asphalt and Aggregate (Jianming Wei and Yuzhen Zhang), Sep., 807

**Surface roughness**
In-Plane Testing Behavior of Adhesive-Bonded Steel Sheets: Influence of Sheet Surface Roughness, Adhesive Thickness, and Bonding Width (Ravi Kant and R. Ganesh Narayanan), March, 292

**Surface structure**
Microstructure Characterization of Mesoporous Materials by FE-SEM (Wu Wei, Liu Ziwei, Hua Jiajie, Zeng Yi, and Li Yongsheng), May, 496

**Survival analysis**
A Linear *S-N* Curve with Load Dependent Variance and Explicit Failure Probability (Venkata Rambabu Dabiru and Anindya Chatterjee), Jul., 557

**Sustainability**
Examining Polymerization of Kaolinitic Concrete Using Scanning Electron Microscopy and Raman Spectroscopy (Chin-kun Kuo, Edward H. Wang, and Chao-Lung Hwang), Nov., 975

**Sustainable asphalt pavement**
Mechanical Characteristics of Asphaltic Mixtures Containing Titanium-Dioxide Photocatalyst (Louay Mohammad, Marwa Hassan, and Sam Cooper III), Nov., 998

**Swelling**
The Assessment of Hand Volume Using a Modified Volumetric Technique (Kavin K. W. Tsang, Grant E. Norte, and James W. Hand), March, 329

**Swelling model**
Recent Developments in the Swelling Model of Expansive Clays for Pavement-Heave Calculations (Moshe Livneh), March, 310

**Swelling pressure**
Recent Developments in the Swelling Model of Expansive Clays for Pavement-Heave Calculations (Moshe Livneh), March, 310

**Switching costs**
Measurement of Switching Cost on the Customer Retention in the Banking Industry (Yi-Hsien Wang, Kuang-Hsun Shih, and Ya-Chi Huang), Nov., 923

T

**Target accuracy**
Evaluation of the Long-Distance Conducted Electrical Weapon XREP® (Sebastian N. Kunz, Matthias Graw, Oliver Peschel, and Nico Grove), March, 281

**TASER XREP®**
Evaluation of the Long-Distance Conducted Electrical Weapon XREP® (Sebastian N. Kunz, Matthias Graw, Oliver Peschel, and Nico Grove), March, 281

**Temperature**
What Have We Learned About Uncertainty? Are We Still Playing with Fire? (Ned Keltner), Jan., 24
Rheological and Rutting Characterization of Asphalt Mixes with Modified Binders (S. Anjan kumar and A. Veeraragavan), Jan., 66

**Temperature compensation optimization**
Experimental Study of Thermal Contact Conductance Based on Heat-Transfer Theory with Variable Thermal Conductivity (Zong Ren Wang, Jun Yang, Mingyuan Yang, and Weifang Zhang), Jul., 677

**Temperature sensitivity**
The Creep Testing Apparatus (CRETA): A New Testing Device for Measuring the Viscoelasticity of Joint Sealant (Qiang Li, Raphael W. Crowley, David B. Bloomquist, and Reynaldo Roque), May, 387

**Tensile behavior**
In-Plane Testing Behavior of Adhesive-Bonded Steel Sheets: Influence of Sheet Surface Roughness, Adhesive Thickness, and Bonding Width (Ravi Kant and R. Ganesh Narayanan), March, 292

**Tensile properties**
Comparison of Tensile Properties of Strain Hardening Cementitious Composite Cured in Normal and Accelerated Conditions (Shunzhi Qian and Zhigang Zhang), Sep., 778

**Tensile strain**
A New Method for Strain Measurement in the Tensile Testing of Filamentous Materials (Mengxi Huang, Fuqi Wu, Ziran Li, and Yuanming Xia), Nov., 890

**Tensile strain-hardening exponent**
Computation of Tensile Strain-Hardening Exponents through the Power-Law Relationship (Ariel E. Matusevich, Julio C. Massa, and Reinaldo A. Mancini), Jul., 521

**Testing and evaluation.**
Evaluation of Ice-Melting Capacities of Deicing Chemicals (B. M. Gerbino-Bevins, C. Y. Tuan, and M. Mattison), Nov., 952

**Testing protocol**
A Practical Dynamic Modulus Testing Protocol (Xinjun Li and R. Christopher Williams), Jan., 100

**Texture**
Comparison of Shape Parameters for Selected Coarse Aggregates in Oklahoma (Dharamveer Singh, Musharraf Zaman, and Sesh Commuri), May, 409

**Thermal constants**
Effect of Phase-Change Materials on Thermal and Mechanical Properties of Asphalt Mixtures (Meizhu Chen, Lu Wan, and Juntao Lin), Sep., 746

**Thermal contact conductance (TCC)**
Experimental Study of Thermal Contact Conductance Based on Heat-Transfer Theory with Variable Thermal Conductivity (Zong Ren Wang, Jun Yang, Mingyuan Yang, and Weifang Zhang), Jul., 677

**Thermal contact resistance (TCR)**
Experimental Study of Thermal Contact Conductance Based on Heat-Transfer Theory with Variable Thermal Conductivity (Zong Ren Wang, Jun Yang, Mingyuan Yang, and Weifang Zhang), Jul., 677

**Thermal-oxidative aging**
Performance Evaluation of SBS Modified Asphalt with Different Anti-aging Additives (Zhengang Feng, Song Xu, Yubin Sun, and Jianying Yu), Sep., 728

**Thin layer surface**
Mechanical Impedance Measurement on Thin Layer Surface With Impedance Hammer Device (Mingliang Li, A. A. A. Molenaar, M. F. C. van de Ven, and Wim van Keulen), Sep., 860

**Threat assessment**
A New Method for Threat Assessment and Uncertainty Analysis of Air-Raid-Target-Based on Connection Number (Yong-Guang Chen, Hong-Fa Ke, and Ke He), Nov., 1033

**Time effect**
Time-Dependent Rheological Changes of Fly Ash Blended Cement Paste (Wei Chen, Zhonghe Shui, and Jianfeng Fan), Sep., 822

**Time zero**
Time Zero Value Based on S-Wave Reflection Loss Measurement for Early Age Shrinkage Monitoring of Cementitious Specimens Subjected to Sealed and Unsealed Curing Conditions (K. C. G. Ong and L. R. Chandra), May, 395

**Time-censoring**
Parameters Estimation Under Step-Stress Life Test Based on Censored Data From Generalized Exponential Model (Ali A. Ismail and S. E. Abu-Youssef), March, 305

**Time-dependent damage**
Application of Digital Image Correlation Technique in Experimental Study of the Creep Behavior and Time Dependent Damage of Natural Rock Salt (Diansen Yang, Weizhong Chen, Jianping Yang, and Guojun Wu), March, 220

**Tire cords**
A New Method for Strain Measurement in the Tensile Testing of Filamentous Materials (Mengxi Huang, Fuqi Wu, Ziran Li, and Yuanming Xia), Nov., 890

**Tire/road noise**
Mechanical Impedance Measurement on Thin Layer Surface With Impedance Hammer Device (Mingliang Li, A. A. A. Molenaar, M. F. C. van de Ven, and Wim van Keulen), Sep., 860

**Titanium dioxide**
Mechanical Characteristics of Asphaltic Mixtures Containing Titanium-Dioxide Photocatalyst (Louay Mohammad, Marwa Hassan, and Sam Cooper III), Nov., 998

**Tool condition monitoring**
Precision Tool Condition Monitoring for Grinding Wheel in IC Manufacturing of Silicon Wafer (Ya-Chen Hsu, W. L. Pearn, and Ya-Fei Chuang), Nov., 916

**Transverse magnetic wave**
Solving an Inverse Scattering Problem of an Embedded Perfectly Conducting

Cylinder by Asynchronous Particle Swarm Optimization (Chien-Ching Chiu, Jung-Chin Hsu, and Wei-Chun Hsiao), Nov., 896

**True strain**
Computation of Tensile Strain-Hardening Exponents through the Power-Law Relationship (Ariel E. Matusevich, Julio C. Massa, and Reinaldo A. Mancini), Jul., 521

**True stress**
Computation of Tensile Strain-Hardening Exponents through the Power-Law Relationship (Ariel E. Matusevich, Julio C. Massa, and Reinaldo A. Mancini), Jul., 521

**Turbine blade**
In Situ Eddy-Current Testing on Low-Pressure Turbine Blades of Aircraft Engine (Gong-Jin Qi, Hong Lei, Gang-Qiang Fu, Peng Jing, and Jun-Ming Lin), Jul., 553

**Turbogenerator**
Low Cycle Fatigue Experiments on Turbogenerator Steels and a New Method for Defining Confidence Bands (Giorgio Olmi), Jul., 539

U

**UL 94**
Investigation on the Flammability of Diverse Cast PA6 Semi-Finished Products (M. Andó, T. Czigány, and G. Kalácska), Nov., 1027

**Ultrasonic testing**
Time Zero Value Based on S-Wave Reflection Loss Measurement for Early Age Shrinkage Monitoring of Cementitious Specimens Subjected to Sealed and Unsealed Curing Conditions (K. C. G. Ong and L. R. Chandra), May, 395

**Ultrasonic wave**
Investigation on Characteristics of Internal Structure of Early-age Concrete by Non-destructive Testing (Zhonghe Shui, Sha Ding, Wei Chen, Kai Li, and Jianxin Lu), Sep., 814

**Uncertainty**
Uncertainty in Fire Protection Engineering Design (Morgan J. Hurley), Jan., 12
Who Gets the Benefit of the Doubt From Uncertainty? (John R. Hall, Jr.), Jan., 18
Characterizing the Precision Uncertainty in Vibratory Roller Measurement Values (Norman W. Facas and Michael A. Mooney), Jan., 43

**Uncertainty analysis**
What Have We Learned About Uncertainty? Are We Still Playing with Fire? (Ned Keltner), Jan., 24
A New Method for Threat Assessment and Uncertainty Analysis of Air-Raid-Target-Based on Connection Number (Yong-Guang Chen, Hong-Fa Ke, and Ke He), Nov., 1033

**Undersealing**
Trial Grouting under Rigid Pavement: A Case History in Magong Airport, Penghu (James C. Ni and Wen-Chieh Cheng), Jan., 107

**Uniaxial compression**
Using Disturbed State Concept to Predict the Stress–Strain Response of Concrete Attacked by Sulfate (Yanfeng Nie and Chunxiang Qian), Sep., 761

**Usage performances**
Determining Performance of Marble Finished Products on Their Usage Areas by a New Impact-Resistance Test Method (Gencay Sariisik), Nov., 945

**UV aging**
Performance Evaluation of SBS Modified Asphalt with Different Anti-aging Additives (Zhengang Feng, Song Xu, Yubin Sun, and Jianying Yu), Sep., 728

V

**Variable number of servers**
Optimization Analysis of the Machine Repair Problem with Balking and Variable Number of Servers (Kuo-Hsiung Wang, Yuh-Ching Liou, and Dong-Yuh Yang), Nov., 907

**Verification**
Application of Hilbert-Huang Transform to Inertial Profile Verification: A Laboratory Approach (Mei-Hui Lee and Chia-Pei Chou), Jan., 165

**Vertical swell percentage**
Recent Developments in the Swelling Model of Expansive Clays for Pavement-Heave Calculations (Moshe Livneh), March, 310

**Vibration isolator**
Measurement of Creep-induced Change of Dynamic Stiffness of Resilient Materials Used for Impact Sound Isolation in Floating Floors (Tongjun Cho), Jul., 661

**Viscoelastic**
Comprehensive Evaluation of Small Strain Viscoelastic Behavior of Asphalt Concrete (B. Shane Underwood and Y. Richard Kim), Jul., 622

**Viscoelastic property**
Properties of Asphalt Mixtures Containing Various Fibers (Qunshan Ye and Hongxin Guan), Sep., 708

**Viscoelasticity**
The Creep Testing Apparatus (CRETA): A New Testing Device for Measuring the Viscoelasticity of Joint Sealant (Qiang Li, Raphael W. Crowley, David B. Bloomquist, and Reynaldo Roque), May, 387

**Viscosity**
High-Temperature Viscosity Performance of Crumb-Rubber-Modified Binder With Warm Mix Asphalt Additives (Hainian Wang, Zhengxia Dang, Zhanping You, and Dongwei Cao), Sep., 687
A Study on Photo-thermal Coupled Aging Kinetics of Bitumen (Hui Wang, Zhengang Feng, Bo Zhou, and Jianying Yu), Sep., 724
Study on the Intrinsic Viscosity of Bitumen Containing Organo Montmorillonite Nanoclay (Gang Liu, Martin van de Ven, Shaopeng Wu, and Andre Molenaar), Sep., 833

**Voids content**
Evaluating Laboratory Compaction of Asphalt Mixtures Using the Shear Box Compactor (J. Qiu, N. Li, F.P. Pramesti, M.F.C. van de Ven, and A.A.A. Molenaar), Sep., 844

**Volume measurement**
The Development and Evaluation of Blood Volume Measuring System for Blood Culture Quality Improvement (Hun Shim, Kab Seung Kim, Young Uh, Dong Min Seo, Hyo Youl Kim, and Young Ro Yoon), Jul., 655

**Volumetric property**
Estimation of Optimum Compaction Temperature for PMA and WMA Mixtures by Volumetric Property Evaluation (Moon-Sup Lee, Sungun Kim, and Kwang W. Kim), May, 463

**Volumetrics**
Laboratory Evaluation of Warm Mix Asphalt Influence on Theoretical Maximum Specific Gravity (Jianhua Yu, R. Christopher Williams, and Ashley F. Buss), Jul., 669

**Volumetry**
The Assessment of Hand Volume Using a Modified Volumetric Technique (Kavin K. W. Tsang, Grant E. Norte, and James W. Hand), March, 329

W

**Warm mix asphalt**
Effects of an Amine Anti-Stripping Agent on Moisture Susceptibility of Sasobit and Aspha-Min Mixes by Surface Free Energy Analysis (Aravinda Buddhala, Zahid Hossain, Nazimuddin M. Wasiuddin, Musharraf Zaman, and Edgar A. O'Rear), Jan., 91
Effects of Additives for Warm Mix Asphalt on Performance Grades of Asphalt Binders (Chaofan Wu and Menglan Zeng), March, 265
Estimation of Optimum Compaction Temperature for PMA and WMA Mixtures by Volumetric Property Evaluation (Moon-Sup Lee, Sungun Kim, and Kwang W. Kim), May, 463
Laboratory Evaluation of Warm Mix Asphalt Influence on Theoretical Maximum Specific Gravity (Jianhua Yu, R. Christopher Williams, and Ashley F. Buss), Jul., 669

Mechanical Characteristics of Asphaltic Mixtures Containing Titanium-Dioxide Photocatalyst (Louay Mohammad, Marwa Hassan, and Sam Cooper III), Nov., 998

**Warm mixture asphalt additive**
High-Temperature Viscosity Performance of Crumb-Rubber-Modified Binder With Warm Mix Asphalt Additives (Hainian Wang, Zhengxia Dang, Zhanping You, and Dongwei Cao), Sep., 687

**Warm-mix asphalt**
Comparative Study on Laboratory Performance of Hot- and Warm-mix Asphalt Mixtures (Yiqiu Tan, Meng Guo, Huining Xu, and Rui Zhang), Sep., 715

**Waste containment**
Evaluation of Bentonite-Fly Ash Mix for Its Application in Landfill Liners (M. M. Younus and S. Sreedeep), May, 357

**Water hydraulics**
Experimental Testing and Numerical Evaluation on Freezing for Water Hydraulics Application under Sub-Freezing Ambient Temperature Environment (Patrick S. K. Chua, F. L. Tan, and J. Zhang), Jan., 137

**Weibull distribution**
An Effective Procedure for Calculating Weibull Production Yield with Mean Shift (Ya-Chen Hsu, W. L. Pearn, and Yuan-Yi Li), May, 447

**Weigh-in-motion**
Testing of a Bridge Weigh-in-Motion Algorithm Utilising Multiple Longitudinal Sensor Locations (Arturo González, Jason Dowling, Eugene J. O'Brien, and Aleš Znidarič), Nov., 961

**WIM**
Testing of a Bridge Weigh-in-Motion Algorithm Utilising Multiple Longitudinal Sensor Locations (Arturo González, Jason Dowling, Eugene J. O'Brien, and Aleš Znidarič), Nov., 961

**Winter maintenance**
Development of Standard Laboratory Testing Procedures to Evaluate the Performance of Deicers (Michelle Akin and Xianming Shi), Nov., 1015

**Winter roadway maintenance**
Evaluation of Ice-Melting Capacities of Deicing Chemicals (B. M. Gerbino-Bevins, C. Y. Tuan, and M. Mattison), Nov., 952

X

**X-ray computed tomography (CT) scanner**
Evaluation of Air Void Distributions of Cement Asphalt Emulsion Mixes Using an X-Ray Computed Tomography Scanner (Zhenjun Wang and Jingjing Xiao), March, 273

Y

**Yield**
An Effective Powerful Test for Supplier Selection Evaluation with Multiple Characteristics (W. L. Pearn, Y. T. Tai, and C. Y. Wang), Jul., 633

**Yield stress**
An Alternative Approach to Determine Material Characteristics Using Spherical Indentation and Neural Networks for Bulk Metals (A. H. Mahmoudi, S. H. Nourbakhsh, and R. Amali), March, 211
